In honor of Imam W. Deen Mohammed

"You imams, let the educators come forth and teach my people. They don't have to take your place, just let them teach the people."

Imam W. Deen Mohammed

Bismillaah irRahmaan, irRaheem

With G_d's Name,
The Merciful Benefactor, The Merciful Redeemer

I dedicate this book to my wife, my partner and my best friend, *Kareema Medina Bilal*. Even I, as a "wordsmith" cannot express in words how grateful I am to Allah for having you in my life.

I want to also express love and appreciation to my eight birth children:
Nafees, Nadirah, Na'im, Najah, Baseerah, Uswa, Ruhiyyah and Luqman
as well as to my three children acquired by marriage:
Khalil, Ihsan and Aminah…
You have all encouraged me in ways that you cannot imagine and it has led me to complete this project, which I consider to be a *sacred* part of my mission.

I want to posthumously thank my parents, Kenneth and Fannie (may G_d accept them into Paradise), for raising me to be an *independent thinker*.

I must express my sincere appreciation to a singular, unique and True Human leader: Imam Wallace (Warith) D. Mohammed.

It would take a completely separate book in order to highlight the linguistic means and methods he employed in bringing millions of people from narrow and self-centered concepts of self and others into the universal perspective of humanity so many of us enjoy today. And he accomplished it all—through the intelligent use of language.

I hope to see him again in Paradise.

And last but certainly not least, this book is dedicated to ALL of the Learners, past, present and future:

Your love for learning inspires me to continue seeking new and better ways to present the knowledge Allah has blessed me with, so that my contribution to your individual study might help you and inspire you to pass it on, beginning with your children.

Use this book as a workbook and consider it the beginning of a linguistic journey leading you down the road to discovering Qur'anic-Arabic in a way that will hopefully instill in you a "New Paradigm in Qur'anic-Based Thinking".

Your responses are welcomed!

As Salaamu 'alaykum: *The Peace obligates you.*
Your Instructor,
Benjamin Bilal

INTRODUCTION.

Etymology is the study of word origins.

In the course of our lifetime, we will use thousands of words without ever stopping to ponder how they were formed or wonder about the nature of their relationships to other words. Words in one language can often be traced back through time using different languages to uncover their origins and primary meanings. Our intention here is to demonstrate the relationship between Arabic words, English words and their meanings, for the purpose of understanding the Qur'an based upon the ancient Arabic prototype, while using a paradigm that is familiar to English speakers.

Every letter in the Arabic alphabet has its own unique meaning which you will see in the letter breakdown. The complete meaning of a word is determined by what I call **seed** letters. Just as a physical seed takes root and grows into a beneficial plant, a **seed** letter will produce **root** words that can potentially develop into branches of useful knowledge. In Arabic, one of the meanings for the letter **"nūn"** (pronounced *"noon")* is **"seed".** Based on that letter-word association, I have called this area of study "**NūNetics**".

NūNetics is the process of learning words based upon the:

- connections,
- connotations
- implications
- applications

of their **seed** letters.

NūNetics introduces a system of understanding word definitions that is consistent with what the Qur'an calls the **fitrah.**

Fitrah is an Arabic term which can be defined as the **patterns of structure and behavior inherent in all objects in nature**.

GRIMM'S LAW

Over time, words **evolve** as they are **transferred** from one language or culture to another. All of the sounds that are created in the human mouth can be categorized into **seven core groups**. Any one sound in a specific group can be interchanged with another sound within the same group. This principle is called **Grimm's Law**.

GROUP	ENGLISH	ARABIC
Vowels (breath sounds)	a,e,i,o,u	fatha,kesra,damma,
Labials (lip sounds)	b,f,p,v,w	ba,fa,waw
Gutturals (throat sounds)	hard c,g,h,j,k,x,y	alif,'ayn,ha,kaf,qaf,jeem
Liquids (tongue sounds)	l,r	lam,ra
Nasals (nose sounds)	m,n	meem,noon
Dentals (tooth sounds)	d,t	dal,ta,tha,taw,dhal,dad
Whistling fricatives (whistle sounds)	soft c,s,z,sh,th	seen,saad,zay,sheen

MY PROCESS

My process for explaining the meanings of the letters will be as follows:

- The **part of the body** …

  which is *represented* by the letter

- the **environmental meaning** …

  which is *conveyed* by the letter

- the **abstract meaning …**

  which is *conceptualized* **by the letter**

- the **Quranic root word references …**

  which *corroborate* the **fitrah** meaning of the letter

1. /a/ alif

- **THE PART OF THE BODY REPRESENTED**

/a/ represents the **spine connected to the skull**

- **ENVIRONMENTAL MEANING**

/a/ denotes a **vertical column**; any **pillar** sturdy enough to **uphold** or **support** a **structure**.

Example: An **outstanding** and **upright** citizen of a community. **Parents** and **children** as ***supporters*** in the home. Businesses (or anything contributing to the tax base) that are the ***economic backbone*** of a town or city.

- **ABSTRACT MEANING**

a **covenant or agreement**

alif /a/ suggests a **formal agreement** which commits the parties who enter into it. **/a/** implies the meaning of *strong protection*.

Example: **/a/** conveys the idea **of ideologies and philosophies which uphold structures**, whether they be *social*, *governmental*, *economic* or *cultural*. All **agreements, whether public or private** are covered by the meanings inherent in **/a/**.

In contrast to English, Arabic words are written from right to left. When the Arabic letter **alif** is written, it is joined to another letter from the *left* side only but separated from letters on its *right* side.

For this reason, **/a/** can also suggest— *detachment*. This idea of detachment is seen in the English word "aloof" which is consonantally related to /a/ **alif**. **A leaf** on a tree captures this same idea in that it is attached to the branch but can become detached. If we pronounce the two words "a leaf," we can still hear the consonantal connections to the words **alif** and "*aloof* ".

- **QUR'ANIC WORD REFERENCES**

Alif-Ba-Dal = he remained/stayed, abode, dwelt constantly/permanently, to render perpetual, time (in an absolute sense), long time, endless/eternal/forever, unlimited/indivisible, lasting/everlasting, unsocial/unfamiliar, never (when used in negative construction).

Alif-Ba-Qaf = to run away, fled, went away, he confined/concealed/restricted himself, runaway/fugitive.

abaqa vb. (1) perf. act. 37:140

Alif-Ba-Ra = a needle, a thing pointed. Abraham.

Alif-Dal-Miim = seasoned (e.g. food), to mix/associate/unite/mingle together, a means of access, pattern/exemplar, object of imitation, tanned skin/hide, leather, the surface of the earth/ground, Adam, Children of Adam, human beings.

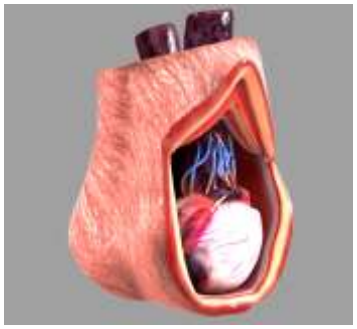
Alif-Ha-Dal = make/call it one, unity, anyone/anything.

ahada ashara (eleven).

Alif-Kaf-Lam = swallowing food after chewing, means of subsistence, devoured/consumed, fed/supplied, to eat/gnaw, things to be eaten, eatables.

Alif-Kha-Dhal = to take in one's hand, received/acquired, derived/deduced/admitted, accepted, accept a covenant, affected/influenced, overpowering influence, take captive, gain mastery, slew/destroy, captivate/fascinate.

2./b/ baa



- **THE PART OF THE BODY REPRESENTED**

  /b/ is **the abdomen**—more specifically, **the bowels** or **guts**. **/b/** is also represented in **the testicles**.

- **ENVIRONMENTAL MEANING**

  any **container** in which **groups of people or things** are **placed** which will eventually be **emptied out** and **replaced**.

Example: Just as things are ***temporarily housed*** in the abdomen between the processes of ingestion and digestion. I believe that **/b/** was originally connected to the Arabic word *bayt* which means *house*. This also holds true for several other Semitic languages in which the word meaning for the letter **B** is house.

/**b**/ is also illustrated in the **emptying** and **replacement** of semen after being released from its container - the **testicles**.

- **ABSTRACT MEANING**

  /b/ is conveyed by the words ***in*** and ***with,***

/b/ implies the meaning of *family* as *housed in the same space.*

Example: The members of a family reside **in** a house **with** each other, yet each individual is a separate though related entity. This is also true for each individual sperm in the testes. Each gamete represents a new and unique potential person, however, they share the same container, living together as a group - just as families do.

Example: In the aristocratic parts of Europe, family surnames are often prefaced by "*The House of…*," as in The "House of Windsor". One generation of a family produces a succeeding generation who eventually moves out of the house or dies and is then replaced by the next generation, maintaining the idea of **emptying out** and **replacing**.

> **/b/** also connotes **any two attached entities** which **eventually split** into **opposite** although **complimentary** parts.

Example: In ancient times, people lived in tents which were *separated into male and female sections* after the children were born. English retained that connotation and built it into the capital letter **B** which consists of **two compartments**—upper and lower. When this same letter is turned horizontal with the straight line on top and semi-circles beneath, you can see the pictograph of the **testicles**. The idea of a container has been maintained in this Arabic glyph as well.

ب

The **human mind** or **intellect** is also a **container** which separates all thoughts into **moral** and **rational** components. Thoughts create feelings that are stored in the subconscious mind, which shape our *moral* attitudes. In turn, these attitudes influence our decisions to do or not do particular things. The things we subsequently decide to do are then directed to the *rational* part of the mind where they are implemented as our sense of morality instructs them to. In this manner, **/b/** represents the *intellect*, which we can define as the *dwelling place* where ideas are formed and evaluated, applied and eventually replenished by new ideas.

- **QUR'ANIC WORD REFERENCES**

Ba-Alif-Ra = sunk/dug, hollow/hole, hid/conceal it, stored it for time of need, well.

Ba-Dal-Lam = changing/altering - with or without substitution, replacing/exchanging.

Ba-Ha-Ra = Slit, cut, divide lengthwise, split, enlarge or make wide

Ba-Kaf-Kaf = (e.g. bakka) = pounding or crushing (al-&unuqa: (on) the neck) (daqqul-&unuqa), distinguishing/ranking above others (farraqahu, kharaqahu), jostling, pressing or crowding(crowds:zahm), any crowding(or crowds), competition. (izdihaam) heaping/piling together/amassing (taraakib),

Ba-Lam-Dal = A country, land, region, province, district, territory, city, town, village or any portion of earth or land within certain limits

Tract of land without vegetation, pasture

Waterless desert, desolate place

Earth or ground.

Remaining, staying, abiding, dwelling in the country/place/land/town/city/village etc.

3. /t/ taa

- **THE PART OF THE BODY REPRESENTED**

/t/ denotes the **hair when groomed**, **cut** or **plucked** whether the hair is connected to the scalp, face or body.

All body hair is sub-rooted and **/t/** represents the hair *above* the scalp which is connected to the roots *beneath* the scalp. The hair *above* the scalp receives sunlight, air and moisture while the hair *beneath* the scalp receives the nutrients from the blood.

- **ENVIRONMENTAL MEANING**

/t/ is a **tie** or **tether**.

Example: It represents any **two things** which exist independently, yet are **connected** to each other. One of the earliest biological tethers is the connection of the infant to its mother through the placenta during pregnancy.

A further example of **/t/** is anything that is **tied to someone or something else** to form **a reciprocal relationship**, with different results for each party. This is represented in the subsequent breastfeeding of the child. The infant receives nourishment while the mother receives the advantage of having her overstretched uterus return to normal size as a result of lactation. Both mother and child benefit—although differently— from this physical and emotional connection.

- **ABSTRACT MEANING**

/t/ can be compared to hair which, because it is sub-rooted, can only be felt **beneath the surface** of the skin. The *conscious mind* is analogous to the hair *above* the skin which when causes no pain when combed cut. Likewise, sensitivities and emotions reside in the *subconscious* and can be manipulated causing intense emotional pain in the same way that pulling the hair causes discomfort beneath the scalp.

- **QUR'ANIC WORD REFERENCES**

Ta-Ba-Ayn = follow/went or walked behind/after, overtook, pursue/investigate/examine/hunt, sought/reach/obtain it, prosecute/sue (for right/due or blood-revenge), succession of one to another, consecutive/successive, follower, imitator, continue the same course, aid/assist/help, come with, obey, desire/demand.

Ta-Ba-Ba = suffer loss, diminution, become beaten/trodden/lost, become old, perished, perdition, death, weakened/impaired, to cut-off, curtail, be doomed, destruction/loss/ruin.

Ta-Jiim-Ra = to traffic/trade, be in business, commerce, merchandise, dealt, sold & bought, employed property for the purpose of gain.

Ta-Qaf-Nun = To fatten (a land by watering it with muddy water).

Nature, in born disposition, mud.

To improve a thing, set a thing in good order, do a thing skillfully and thoroughly, fasten a thing, bring to perfection, make a thing in perfect consonance with the purpose to which it has been created.

4. /th/ thaa

- **THE PART OF THE BODY REPRESENTED**

/<u>th</u>/ <u>thaa</u> is also **<u>hair</u>**, but hair which is **<u>loose</u>, <u>unmanaged</u>** and **<u>multiplied</u>**.

ENVIRONMENTAL MEANING

any entities of **<u>three</u> or <u>more</u>**.

Example: Biological reproduction which produces a **<u>third</u>** life form (i.e. mother, father and baby). The concept of multiples is also seen in the English words ***<u>these</u>***, ***<u>those</u>*** and ***<u>thousands</u>***. /t/ is seen in things that **<u>abundantly reproduce</u>**.

Any **<u>multiples</u>** that are **<u>perceived as one</u>** (*sand* on the shore, *leaves* on the trees, *soil* in the garden, et al), or one thing that can produce many—especially in large numbers (*seeds*, *fruit*, *mothers*, *fertility*, *fecundity*, et al). **/th/** is **<u>anything which amasses</u>** such as *stockpiles*, *surpluses*, *mobs*, *assemblies*, *collections*, *throngs* and *congregations*.

- **ABSTRACT MEANING**

/th/ is accumulations, gatherings, increases, things plural, luxuriant, thick, profuse; anything cultivated

- **QUR'ANIC WORD REFERENCES**

Tha-Ayn-Ba = to cause to flow or pour out, give vent to, to run/stream, a long serpent.
Tha-Ba-Ya = to collect/congregate/gather, put together, complete. thubaat (acc. pl. of thubatun, which is the f. of thuban/thubayun) - in separate companies, groups, detachments, parties. To praise/honour/magnify/mention (e.g. a collection of good points).
Tha-Kh-Nun = to be thick, become coarse, stiff, subdue thoroughly, have a regular fighting, cause much slaughter, have a triumphant war, to render/inflict, to be made heavy with something or prone.
Tha-Lam-Tha = to become three in division or number, a third part of a thing, one third, by threes, the third of any number.
Tha-Miim-Ra = to bear fruit, fructify, get rich, increase or multiply, to gain more of something. thamar - fruit, wealth, possession, profit, income.
Tha-Qaf-Lam = to be heavy/weighty, slow/dull/sluggish, difficult/hard/grievous. thaqalaan (dual of thaqalan) - two big and weighty things, two armies. athqaal (pl. of thiql) - burden. thaqiil (pl. thiqaal) - heavy. mithqaal - weight, weight of a balance. tathaaqal - to be dull/sluggish. thaqala - to grow heavy, oppress, weigh down. mathqalatun - burdened, heavily laden, any cause of depriving a mother of her child. ithhaqala (for tathaaqala) - to be born down heavily, incline heavily downwards.

5. /j/ jeem

- **THE PART OF THE BODY REPRESENTED**

/j/ jeem is the **legs, knees** and **feet** specifically when **moving towards water**.

Example: Throughout history, the migrations of humans and animals to a given area has been driven by the presence or absence of access to potable water in that location. The lack of water contracts, withers and puckers the skin. When this happens, the skin becomes jammed, crammed and tightly compact.

- **ENVIRONMENTAL MEANING**

/j/ is **walking**. It is the **motion of entities towards a central goal**.

Anything related to the movement of legs, knees, feet, joints and bones

Example: The congregating of any **group** which **shares the same objective**. People gathering for a *concert*, *dance party*, *club meeting*, a *wedding*, or a *lecture*. If they are there for similar purposes, it is represented in the letter **/j/**.

- **ABSTRACT MEANING**

Another demonstration of the abstract meaning of the letter /j/ is found in the Qur'anic words **Jenna** and **Jehenna** which mean *Paradise* and *Hell-fire* respectively wherein G_d speaks about the feeding of pure food and drink in *Jenna* and the forced-feeding of rotten food and drink in *Jehenna*. In both cases, food and drink are the end result.

Jeem is also consonantally connected to the English word **gym**. Gym period in school usually involves the movement of many legs during the course of its activities. When gym time is concluded, everyone heads for the *showers* or to drink from the *water fountain*.

/j/ as conveyed in the Arabic word ***jumu'ah*** represents the *gathering* at the masjid on Fridays for lecture and prayer. This is when Muslims receive their mental, moral and spiritual sustenance for the week, which serves as **spiritual water** necessary for a healthy human life.

Incidentally, the letter **/m/ meem**, which is the second consonant in the word jee**m**, means *water*. The word *jeem* literally refers to:

The letter "**j"** by itself means *legs* and *feet*.
The elongated ***"ee"*** sound means *stretching or moving out towards*,
In this case, towards **"m"** or *water*.

An additional **abstract meaning** of the letter **/J/** is any group activity in which an emotional or ethical conclusion is sought and/or reached, as in the English word "*jury*". It is represented again in the Arabic word "*Jumu'ah"* wherein Muslims gather to receive Quranic reminders designed to increase moral and ethical awareness and behavior. Many of the great philosophers and psychologists such as Plato and Jung have used water to symbolize both emotions and morals.

- **QUR'ANIC WORD REFERENCES**

Jiim-Ba-Ba = a well, a well containing much water, a deep/wide well, he shrank/withdrew/was averse/went away, the act of fleeing. A cavity in a mountain in which the water of the rain collects.
Jiim-Ba-Ya = He collected (e.g. water/tax). A mode/manner of collecting. He chose it/selected it for himself. He returned/receded/retreated/went back. Collecting in a way of choice/selection (i.e. God blessing Solomon more than others etc.) He forged/produced/invented it. Water collected. A watering trough in which water is collected. The place where a well is dug. What is around a well/watering trough. Dug wells in which shoots of grape-vines are set. A collector of water for camels. Locust (it collects everything by eating it), A company of men.
Jiim-Lam-Siin = To sit, to sit cross-legged, sit in company with someone or others.
Jiim-Miim-Ayn = To collect or gather, bring together, to contract, assemble or congregate, unite or connect or form a connection, bring into a state of union, reconcile or conciliate, put on a thing [such as clothing article], to compose/arrange/settle, to pray in congregation, determine/resolve/decide upon a thing, agree or unite in opinion, prepare or make a thing ready, dry up a thing, conspire or league with another, coexist with one, to be compact/compressed/contracted, exert one's energy, to compromise or comprehend or contain, enter or go into, to meet or be in company with another.

Jiim-Nun-Dal = Collect or assemble [armies, military forces], prepare an army, *Jundun* [collected body of men prepared for war; auxiliaries].

Jiim-Ra-Fa = To take away/carry away/remove the whole or greater part of a thing or much of it, sweep or sweep away, clear something away, shovel or scoop a thing up or out, to be greedy, have an inordinate desire or appetite for food.

Jiim-Ra-Ra = To drag/draw/pull/tug/stretch, extend, to continue a thing (meaning the act of "dragging"), gently drive [He drove *camels and sheep or goats* gently, letting them pasture as they went along], delay or defer, to put off, to re-iterate.

Jiim-Tha-Waw = To sit upon the knees, to kneel, to fall on one's knees, stand upon the extremities of one's toes, to sit knee-to-knee with someone.

6. /H/ Haa (heavy)

- **THE PART OF THE BODY REPRESENTED**

the **arms**, when **embracing**, **surrounding** and **protecting**. /H/ also, it signifies **heavy breathing** in which the lungs figuratively *embrace* and *protect* the body by eventually returning it to its normalcy (safety).

- **ENVIRONMENTAL MEANING**

any **heavily reinforced fence** or **protecting wall,** allowing for normal activity within its interior.

EXAMPLE: Protection implies an environment of emotional security or *warmth* and therefore, **/H/** also connotes "*warm*". **/H/** is anything that is continuously exposed to heat. Africans were called the "Children of **H**am" because of their exposure to the heat of the African sun. The Semitic word "*Ham*" is spelled with this heavy **/H/.**

- **ABSTRACT MEANING**

healthy, abundant and *quickened* spiritual consciousness as it operates in the *core* of one's intellect. In the Bible, *Abram* becomes *Abra**H**am* after being quickened by G_d's inspiration. However, it is specifically a spirit which commits one to a major responsibility. /**H**/ is a consciousness that brings us into an understanding of **h**igher **h**uman concerns.

EXAMPLE: Intact spiritual life protects the integrity of the **intellect's** qualities in the same way that the **h**uman arms defend against bodily **h**arm. In the phrase "***H**ayyah 'ala-s-salaah!*", which

means *"Come quickly to the prayer,"* the word ***Hayyah in this context,*** suggests *rapid breathing* which occurs in an effort to satisfy *a social responsibility (congregational prayer).*

- **QUR'ANIC WORD REFERENCES**

Ha-Ba-Ba = To be loved/beloved, affected/liked/approved, be an object of love, lovely/pleasing/charming, take pleasure in a thing, stand still or stop, be fatigued or tired, form a thing into something else, fill or satiate a thing (with water or drink), become clotted/form a clot, form or break out with pimples/bubbles/small pustules. To love, like, wish.

Ha-Dal-Ba = To be protuberant; Convex; Humpbacked. To rise, to grow up or out, grow high, to be affectionate or favorable or kind, to defend someone, elevate or raise high the back, to be curved/winding and long.

Ha-Fa-Fa = To surround, encompass, throng around; crowd round; go around.

Ha-Fa-Za = To preserve/guard/protect a thing, take care of a thing, prevent a thing from perishing, to be careful/mindful/regardful/attentive/considerate concerning a thing, to keep a thing, put in store, retain a thing, learn a thing by heart (commit to memory), to remember, to defend, keep a thing from getting lost, to be observant or watchful, apply oneself/assiduously/constantly/perseveringly, vigilant or heedful, to anger a person or be angered.

Ha-Kaf-Miim = To restrain from, exercise authority, command, give judgment, judge, be wise. To restrain/prevent/withhold a person from acting in an evil or corrupt manner, to judge or give judgement, pass sentence, decide judicially, exercise judicial authority/jurisdiction/rule/dominion/government, order or ordain or decree a thing, to be wise, to be sound in judgement, possess knowledge or science and wisdom, render a thing firm/stable/sound/free from defect or imperfection by the exercise of skill.

Ha-Lam-Qaf-Miim = windpipe, passage of breath. To cut or sever one's windpipe, to become ripe next to base (dates), leave or forsake food.

Ha-Miim-Ya = To protect/prohibit/guard/defend against encroachment/attack. A thing prohibited, prohibit a thing. Vehement/angry, it was/became hot (e.g. day, oven), disdain/scorn/indignation/jealousy/anger, to be ashamed, refuse to bear/endure/tolerate wrongful treatment.

Ha-Nun-Jiim-Ra = To slaughter by cutting the throat. *hanjarah* - throat, windpipe, passage of breathing, head of the windpipe, whole of the larynx.

Ha-Nun-Nun = To have a longing desire for, to be affected with an intense emotion of grief or joy, emit a sound as a she-camel towards her young, have mercy/compassion/pity/tenderness of the heart, yearn towards, merciful/compassionate/favorably incline towards a thing.

Ha-Ra-Miim = To forbid/prevent/prohibit, make or declare unlawful, deprive, to be sacred/inviolable/entitled to reverence or respect or honour, deny or refuse a thing, render one hopeless, denied prosperity, render unfortunate, ill-fated, persist obstinately, persist in contention or litigation or wrangling, be refractory or untractable, bind a thing hard, refrain from a thing, overcome someone in contending for stakes or wagers in a game of hazard, to be in a state of prohibition, protect or defend oneself.

Ha-Ra-Siin = To guard/keep/preserve, take care of a person or thing, watch over.

Ha-Ra-Ya = To aim, seek, select, choose, intend or propose (a thing), to be adapted/disposed/apt/suited/suitable/fit/competent/proper for a thing, worthy of a thing, to seek or repair to the vicinage/quarter/tract/region of a people, aim at a thing, make a thing one's own possession, endeavour to reach or obtain a thing, to seek what is most suitable or deserving to be done.

Ha-Sad-Nun = To be guarded, be inaccessible/unapproachable, be chaste, be strongly fortified, difficult to access, be preserved, be protected (against attack), abstain from what is not lawful nor decorous, preserve or guard a thing in places inaccessible/unapproachable, make or render a thing inaccessible or unapproachable or difficult to access, make/render a thing unattainable by reason of its height, to fortify oneself.

Ha-Siin-Miim = To cut a thing or cut it off, stop, deprive, to cause to pass away, come to an end, cease/perish/come to naught, to strive/labor/toil/exert oneself, weary oneself in work, to be cut off.

Ha-Waw-Tay (Ha-Alif-Tay) = To guard/keep, keep safely/protect/take care of a person or thing, defend a person or thing, pay frequent attention to a person or thing, to mind or be regardful of one's things, have compassion or affection for a person, to undertake/superintend/manage one's affairs, retire to a distance, to leave and go against, take care of and preserve (the tie of kindred), draw towards oneself or compress and guard one's possession, to surround/encompass a thing, build a wall around a thing, have within one's compass or power and care a thing or affair, monopolize a thing, endeavor to induce a person to turn or incline, endeavor to turn a person by deceit or guile (namely in a matter that he desired of him and which he refused him), surround/encompass/environ/enclose/hem in a person or thing, to encircle or beset the sides of a person or thing, to have something or someone in one's grasp or power, to destroy or cause destruction, beset a thing on every side (and leaving no escape), to take a thing entirely to oneself and debar others from it, to comprehend or know a thing altogether or in all its modes or circumstances, to know a thing extrinsically and intrinsically, attain the utmost particular of a

thing, have a comprehensive and complete knowledge of a thing, to pursue a course or thing by prudence or precaution or good judgement, to use precaution, take the sure course, to seek the most successful means, take the surest method.

Ha-Za-Ra = To prevent, restrain, forbid, confine, limit, restrict, enclose, make a limit of separation, protect or defend oneself by means of a person or thing.

7. /kh/ khaa

- **THE PART OF THE BODY REPRESENTED**

the **arms** as well, but when **failing to protect**.

/kh/ is using the arms to *seize* and *detain*.

Example: the Arabic root verb ***kh****abala* means to prevent or hinder from doing a thing. In this respect, **/kh/**, is the opposite of **/H/**, and is demonstrated anytime the arms *fail* to do something which arms normally do as gestures of love and support.

- **ENVIRONMENTAL MEANING**

/kh/ is to **disarm** or to **neutralize** something by **removing** its advantage**.**

Example: the Arabic root verb ***kh****abaTa* means *to strike or beat vehemently*. Any actions designed to diffuse, deactivate or neutralize is under this letter. **/kh/** can also **cut** and **sever** so that the end result is that something becomes weakened or disabled.

Example: the Arabic word ***kh****alaaS* is used to cut off a conversation, and is a way of saying "*That's it! No more!*" /**kh**/ is also the sound of **expulsion** coming from the back of the throat and signifies the idea of making a thing clear, as in *clearing the throat*.

- **ABSTRACT MEANING**

/**kh**/ means to yield or surrender; create an obstacle; abandon, disappoint; it is used to create emotional *friction* as in the phrase "*putting the heat on someone*"; it also represents the heat generated based on coming into knowledge by way of trial and experience. Most of the Qur'anic words beginning with /**kh**/ are negative and have to do with the results of a thing not being properly maintained, managed or supervised. Under these circumstances, many important things are liable to get away from you. The key is to become more cognizant of the things you choose to keep while being simultaneously aware of those people, things and ideas which deserve to be abandoned. The objective is to not become corrupted while clearing your mental, moral and spiritual garage of all unused and unnecessary items. This is the role of a ***kh**alifah*.

- **QUR'ANIC WORD REFERENCES**

Kh-Ba-Lam = To be or become corrupted, unsound, vitiated or disordered in intellect or reason, become possessed or insane, be lost, cut off, deprived of heart or reason;

-prevent or hinder from doing a thing

-Difficulty in people in which they see not happiness.

-Egregious stupidity or foolishness, heedlessness or weakness of intellect, state of perdition or destruction.

-Disordered in the legs so as not to know how to walk.

Kh-Ba-Waw = To subside, abate, die down, fade out, decline, decrease. To be extinguished/extinct/allayed/appeased.

Kh-Fa-Ta = To be still or silent, to be low/soft/gentle, to be weak due to vehement hunger, to be abject, to silence or kill (smite with a sword or the like).

Kh-Fa-Ya = = Imperceptible/unapparent, hidden/concealed/covered, faint or dim to the sight, suppressed or stifled, obscure to the mind, to become manifest from a state of concealment (what was concealed became revealed).

Kh-Nun-Qaf = To throttle/strangle/choke (a person or thing), to straighten, nearly cover or nearly attain a thing, fill/fill up a thing, squeeze or compress upon one's throat, take or seize by the throat, constrain or distress.

Kh-Nun-Siin = To retreat/recede/drawback, retire or hold back, lag behind, shrink and hide/withdraw oneself, remain behind a company of people (as opposed to going with them [syn. *takhallafa*]), sneak something away (so as not to be seen), keep one back, place one behind or after, contract/draw together or make to contract/draw together.

Kh-Siin-Ra = To suffer loss or diminution, to be deceived/cheated/beguiled/circumvented, to err/go astray/deviate from/miss the right way, to perish or die, make a thing defective or deficient, destroy or cause to perish, remove/alienate/estrange someone, to be treacherous/ignoble/mean, to be unfaithful, ungenerous, small/little/weak (among mankind), refuse invitation from another.

Kh-Ta-Ra = Be agitated by a tendency to vomit (the soul or stomach) and thus be in a corrupt or disordered state, act or behave towards another with treachery/perfidy/unfaithfulness (or with deceit, guile or circumvention), behave towards one in a bad or corrupt manner, corrupt or disorder one's soul or stomach and render him relaxed (said of wine or beverage), to be languid and relaxed/heavy/sluggish/fevered, languid in body in consequence of disease.

8. /d/ daal

- **THE PART OF THE BODY REPRESENTED**

the **firmly rooted tooth**

denoting something **hard**, inserted into a **foundation** which is not easily removed.

Example: the *har**d**ness* and ***d**urability* of the tooth.

- **THE ENVIRONMENTAL MEANING**

/d/ is a **door**, **firmly hinged**.

/d/ can also include any **downward movement** or movement *towards a foundation* or *secure platform* as in the English words **d**ive and **d**escend.

Example: in the Arabic word ***d**alaa* which means *he lowered* something, as in the lowering of a bucket. The Arabic phrase, ***D**een-ul-Fitrah* (the Religion of the Originally Created Patterns) represents a religion (way of life) that has been patterned upon the same **d**esign as all of G_d's created objects.

- **ABSTRACT MEANING**

/d/ is the passage from the **known** into the **unknown**. In this regard, **/d/**, represents a **partial mystery**.

Example: the picture of a half-moon. One half is visible, while the other half remains invisible or, mysterious. The capital English letter **D** captures the shape of a half-moon perfectly.

Example: the Arabic verb ***darasa*** means "*he studied*". Study results from learning, and learning is the act of coming to know things that were previously unknown or *in the dark*.

- **QUR'ANIC WORD REFERENCES**

Dal-Lam-Kaf = rubbing, squeezing, pressing, decline, sinking, become red, set, incline downwards from the meridian (sun). The phrase "*duluk-as-shams*" defined as "sunset" / setting of the sun / the sun became high, by Lane.

Dal-Lam-Lam = To show, point out, indicate, direct, point at, guide, delude, discover, lead.

Dal-Nun-Waw (Dal-Nun-Alif) = To be near, come near or low, let down, be akin to.

Dal-Siin-Ra = To repair with nails, spear, caulk and make a ship water-tight, nail a thing, ram in.

Dal-Waw-Miim (Dal-Alif-Miim) = To continue, endure, persist, remain, persevere, last, stand still, keep alive.

9. /dh/ or /Th/ dhaa or Thaa

- **THE PART OF THE BODY REPRESENTED**

a **tooth** also, but a **tooth** which is ***loose*** **o**r ***removed***.

Example: an ***open door*** or a door ***removed*** from its hinges.

- **ENVIRONMENTAL MEANING**

/Th/ represents any state of ***commotion*** or ***fluctuation***. It signifies any *back and forth movement*, such as the motion of *wobbly teeth* or *swinging doors*.

Example: the Arabic word for a fly is ***Th****ubaban*, because the insect flies *back and forth*.

- **ABSTRACT MEANING**

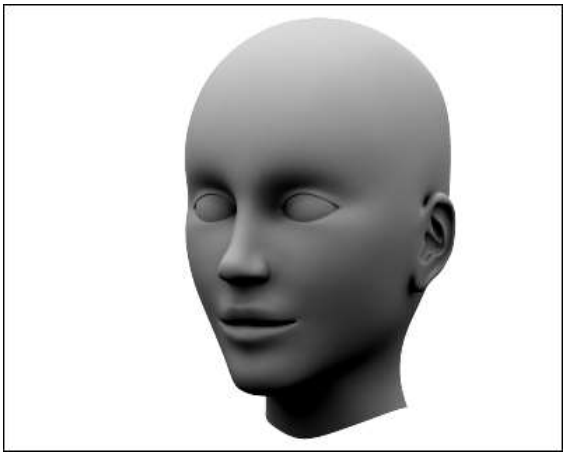
something which **draws the attention** in the same way that *opened doors* or a *loose* or *missing tooth* would.

- **QUR'ANIC WORD REFERENCES**

Thal-Alif-Ba = to collect/gather, expel, despise, urge, frighten.
Be as wicked/crafty as a wolf, wolf, dog of the dessert.
Loud howl/cry/sound, quicken in journey.
State of commotion/fluctuation.

Thal-Alif-Miim = to drive off, banish, blame, despise, disgrace, scorned, repay/requite, frighten/terrify, vice/fault/defect.
Thal-Ba-Thal-Ba = wavering, moving to and fro.
Thal-Ya-Ayn = to broadcast/publish/divulge, to noise abroad, to spread/reveal/manifest, become known.

10. /r/ raa



- **THE PART OF THE BODY REPRESENTED**

/r/ raa is the **front of the head,** and the **roundness of the face** with its **circular** orifices (eyeballs, ears, open mouth and nostrils) or anything circular or spherical.

Example: the Arabic word for *head* is ***raas***, acknowledging the fact that the head is fundamentally round in shape.

- **ENVIRONMENTAL MEANING**

/**r**/ is also representative of things which **move forward** at a **rapid** pace. Also of things that reach the **top**.

Example: It is seen in the English words ***r****unning* or ***r****acing*. /**r**/ is also represented in things that **spin** or **gyrate** or **vacillate**. It is also the tongue **fluctuating** off of the top palate as we pronounce the *rolling* **/r/**.

Example: the English words ***r****evolve* and ***r****evolution*, which indicate things that happen cyclically (over and over again). It is represented in the Arabic word "***r****adda*" which means *to **r**epeat*.

- **ABSTRACT MEANINGS**

/r/ is represented in authority, command and consciousness.

Example: **/r/** is representative of ***consciousness*** as the **center** of intellect and reason, especially when occupying a *top* or *leading* position. In the sky, it would be the sun which *rotates* and *revolves* in the sky and which the ancient Egyptians called **Re**. The sun is a symbol of *social consciousness*. Social ideas and norms also *rotate*, bringing in new seasons of thought, fads, trends, et al that *rule* in society.

Example: the Arabic verb ***r****a'aya* means *he consciously perceived* something.

- **QUR'ANIC WORD REFERENCES**

Ra-Ayn-Dal = to thunder/tremor, threaten of war, tremble/quiver/shiver/commotion occasioned by fear or cold, moved to and fro (e.g. a hill or heap of sand shaking and consequently pouring down).
Ra-Ba-Ba = to be a lord and master, collect, possess/owner, rule, increase, complete, bring up, preserve, chief, guardian, regulator, determiner, caretaker, provider, sustainer, perfector, rewarder, creator, maintainer, reposer of properties, developer, former of rules and laws of the growth, foster a thing in such a manner as to make it attain one condition after another until it reaches its goal of completion, the bringing a thing to a state of completion by degrees, whoever possesses a thing is it's *rabb*.
Ra-Dal-Dal = to send back, turn back, reject, refuse, repel, revert, restore, give back, refer, give again, take again, repeat, retrace, return to original state, reciprocate, reply. *maraddun* - place where one returns. *mardud* - restored, averted. *irtadda* (vb. 8) - to return, turn again, be rendered. *taradda* (vb. 5) - to be agitated, move to and fro
Ra-Fa-Ayn = to raise/uplift/elevate, to take up, to lift/hoist, extol, opposite of *Kha-Fa-Daad* [56:3], uprear it, rear it, make it high/lofty, take it and carry it, raise into view, to exalt, to advance, bring a thing near presenting or offering, to bring forward, to take away, disappear, trace back, honor, show regard to, to introduce, refine, to make known, go upwards, high rank/condition/state.
Anything raised: mountain, throne etc.
Ra-Jiim-Ayn = to return, turn back, turn off, (blame) upon any one, come back, repeat, answer, bring answer, be brought back. *raji'un* - one who returns. *murji'un* - return, termination. *taraja'a* (vb. 6) -to return to one another.

Ra-Jiim-Fa = to quake/tremble, be in violent motion, shake violently, ramble, prepare for war, be restless, stir, spread alarming/false news, engage, make commotion, in a state of agitation, convulsion, tumult, or disturbance. *rajfatun* - earthquake, mighty blast. *murjifun* - scandal-mongers, one who makes a commotion, one who spreads false alarming news/rumors or evil tales.

Ra-Kaf-Ayn = bowed, bent, incline, humility, humble yourself, lower the head, fell upon his face, stumbled.

Ra-Kaf-Ba = to ride, embark, mount, be carried, go on board of a ship, voyage on (the sea), walk on (a road), commit (a fault). *rakbun* - caravan. *rukban* (pl. of *rakib*) - one who rides, mounted. *rikab* - camels. *rakub* - use of a beast for riding. *mutarakibun* - laying in heaps, ridden on one another, close growing, cluster over clustered, layer upon layer. *tarkabunna* - to pass on, rise, ascend.

Ra-Qaf-Ya = to ascend, rise gradually, mount a ladder. *mirqa*t - stair, ladder, stepping-stone, ascent. *raqin* - physician, charmer. *taraqiya* (pl. of *tarquwutun*) - collar bone(s), throat, clavicle (according to some its root is *raqawa* or *tarqawa*).

Ra-Waw-Ha = *Raha* - To go or do a thing at evening. Violently windy; good or pleasant wind. Become cool or pleasant [by means of the wind]. Become brisk, lively sprightly, active, agile, or quick [as though one felt the wind and was refreshed by it].

Rawahun - he went, journeyed, worked, or did a thing in the evening [or any time of the night or day], or in the afternoon (declining of the sun from its meridian until night).

Ruhun - Soul, spirit, vital principle, breath which a man breathes and pervades his whole body. Inspiration or divine revelation [since it is like the vital principle is to the body and quickens man].

Ra-Ya-Ayn = increased or augmented, overflow, exceeded/abundant, redundant, ascend, first/prime or most excellent part, high or elevated place, agitation, quivering.

11. /z/ zaa

- **THE PART OF THE BODY REPRESENTED**
- **/z/ zaa** is the **front of the head** also, but when ***out of control***; indicative of when things escape **conscious** perception.

  Example: the **loss** of **head control** during sleep or the **loss** of **reason** during moments of anger or insanity, as in the English word, *crazy*. **/z/** is **unconsciousness**.

Example: The English letters *zzzz*, commonly is understood to mean *snoring*.

- **ENVIRONMENTAL MEANING**

/z/ is a **break in the circle**, and thereby implies a **defect** or **imperfection**. While **/r/** signifies the *round* face, **/z/** connotes the *deformed* face. It is represented in the concepts of things that are *breached*, *pierced*, *released*, *expanded*, *unorthodox* and *imperfect*.

/z/ is also any **leadership position** in which the **leader** has ***lost control*.** Maybe we should be referencing the words *Nazi* and *Czar* also? Hmmm.

Examples: a parent who has lost *control* of the *house*, a teacher who has *lost control* of the *classroom*, a boss who has *lost control* of his *business* or *employees*.

- **ABSTRACT MEANING**

The **abstract meaning** which is conveyed by the letter **/z/** is a **lack of boundaries** and a **lack of consciousness** concerning the qualities of righteousness and fair dealing. These attitudes and behaviors are typically called *character flaws*.

Example: the English word ***z****ombie*, perhaps the most glaring example of **/z/** character traits English can provide.

Not all connotations of the letter **/z/** are negative. When connected to certain other letters, its implications are modified.

Example: the Arabic word "***z****akee*", which combines **/z/** with **/k/** and means *purity*. **/k/** (you will learn later) means **palm of the hand**, therefore giving the sense of one *preventing* the violation of righteousness with his hand, resulting in purity.

Zay-Ba-Nun = pushed/thrust it (a thing) away, remove/withdraw/retire to a distance, simpleton/fool/unintelligent, a tent/house standing apart from others, a side/lateral/adjacent part or tract or quarter, one who pushes/thrusts away, difficult/stubborn war/battle, certain angels (the tormenters of the damned in Hell).

Zay-Lam-Miim = to cut off anything projecting or prominent, make little in quantity/amount, to fill, make an arrow, an arrow without head or feathers, divining arrow.

Zay-Nun-Miim = base, ignoble, mean, evil character.

Zay-Nun-Ya = to mount, the mounting upon a thing, to commit fornication/adultery, fornicator/adulterer.

Zay-Waw-Jiim = to couple/join/pair/unite/wed, marriage, a pair, a fellow or like, spouse.

Zay-Ya-Dal = increased/augmented/grew, exceeded, was/became redundant/superfluous, remain over & above, addition, exaggerate, accessory, surplus.

12. /s/ seen

- **THE PART OF THE BODY REPRESENTED**

the **lower lip**, **untouched by the breath of the nostrils**. It is also the **skin as it covers the entire body**; also **the eyelid as it droops down over the eye**

The body's skin **covers** over all five senses. And, therefore, **/s/** represents things that *cover, shield, blanket, mask, shroud, border or surround*.

Example: the English word ***s****ecret*.

/s/ also specifically connotes the *brilliance* or *clarity* of teeth.
Example: The Arabic word *"ba**s**ama"* (he smiled). Sometimes secrets are hidden behind smiles.

- **THE ENVIRONMENTAL MEANING**

things that let themselves **fall**, become **diminished**, experience **decline**, become **shed**, **droop down** or **hang low**, such as the *skin* and the *lower lip*.

Example: The Arabic word ***s****afala* means "*he fell down*". The Arabic word ***s****ajdah* includes the meaning of falling down.

- **ABSTRACT MEANING**

lucidity as well as its opposite—**concealment**.

Example: The English word "***s****ecret,*" refers to things that are **s**hielded. Also, the Arabic word "***s****irr*" means "***s****ecrecy*".
Because of the connections to the **s**kin as an external organ (and not the *real* you), **/s/** has also come to represent things ***s****uperficial*.

- **QUR'ANIC WORD REFERENCES**

Siin-Alif-Lam = to ask/interrogate/inquire/question/demand/pray/beg, a thing asked, a question/proposition/problem/petition/request, beggar, that which is demanded or inquired into, asked, questioned, responsible.

Grasped, took. Drew near or close. Became conjoined, accompanied, comprised.

Severe calamity or misfortune.

A thing or thread, string, cord, or the like, by means of which one thing is drawn, and joined, or adjoined, to another thing. A lion that grasps everything. Angry, daring, bold (applied to a man).

Any valley [flowing with water] along which one goes between two long hills of the kind termed *akamat*.

Niggardly in the utmost degree.

One who takes, or gets, everything within his grasp, drawing it to himself. One who eats much, has an inordinate appetite for food, who appropriates to himself exclusively of others.

A company or collection of men not of one stock, but of different tribes mixed together.

A place of assembling (of military forces).

Lean or slander in the belly (as though one part thereof were drawn and adjoined to another).

Dad-Miim-Ra = Became lean or light of flesh, or slender, and lank in the belly by reason of leanness.

Became lean and weak. Became withered, contracted and small.

To feed with food barely sufficient to sustain, after becoming fat. Fed with a fodder so that it became fat, and then reduced it to food barely sufficient to sustain it, which is done during forty days. A training-place in which horses are prepared for racing by being fed with food barely sufficient to sustain them, after they have become fat.

Determined or resolved upon something in the heart and mind. Concealed or suppressed in the heart and mind.

A place or a valley that is depressed concealing one who is journeying in it.

Property of which one hopes not for the return. A debt of which payment is not hoped for, or for the

payment of which no period is fixed for. A gift that is not hoped for.
Contracted pearls or pearls having somewhat of contraction in the middle.
Dad-Nun-Kaf = Became narrow or strait (indicate hardship). Became weak in judgment, in body, in soul, in intellect.
Hard, firm, and compact in the flesh (applied to a man). Affected with a constant or chronic, pervading disease.
Became redundant, increased, or augmented.
Children or offspring.
Dad-Ra-Ayn = to humiliate, abase, object, humble, lower one's self, humility/submissiveness. Dry, bitter, thorny herbage.
Daad-Ra-Ba = to heal, strike, propound as an example, put forth a parable, go, make a journey, travel, mix, avoid, take away, put a cover, shut, mention/declare/state, propound, set forth, compare, liken, seek a way, march on, set, impose, prevent, fight, traffic with anyone's property for a share in the profit, he made or caused to be or constituted, leave/forsake, take away thing (with 'an).
Depressed ground, hard ground in a plain, sandy valley, commissioner as he has to travel much.
Kind manner, lean, thin, similar, alike, the act of striking, a blow, going from place to place, vicissitude of life, affliction especially that which relates to one's person, as disease, death, degradation is common and general suffering. beat, struck, smote, hit, the making a thing fall upon another thing, discipline/train, to cast forth, threw or flung it, seal/stamp, veil/curtain/cover/barrier, to point or make a sign, prohibit/hinder/prevent/withheld/restrain, collision, corrupted/disordered/disturbance/unsettled/confused, turn away, avoid, shun, fashion/mould/adapt, mention or set forth (e.g. a parable/example), explain, make a way, multiplying, go/travel, went away, it was or became long, excite/incite/urge/instigate, contend, dispose/accommodate, retract/digression/transition, to silence, tremble/shiver, share/portion.
Location where something is struck, wool or goat's hair separated or plucked or beaten with a mallet, sword, tent-peg, mallet.

16. /T/ Taaw

- **THE PART OF THE BODY REPRESENTED**

/T/ represents the **back of the upper region of the shoulder**, specifically the *load-bearing* **upper portion of the back.**

Example: the English word "***t****rapezius*" which is the name of the large muscle group located in the upper back and shoulders. We speak of a person who has lost confidence or are depressed as having *hunched shoulders*.

- **ENVIRONMENTAL MEANING**

things that were **once high**, but have **fallen** or **been brought down** to a low or humbled position. Example: the Arabic word "***t****awr"* meaning **bird.** A bird can begin its flight upwards from high in a tree and subsequently descend to earth.

Example: the Arabic word *"**t**ur"* which means *"mountain"*. A mountain which was *once high* and imposing can become leveled with the ground over time. Anyone who climbs a mountain, no matter how high they ascend, at some point, must come down.

- **ABSTRACT MEANINGS**

Powerful people and nations, especially those that **tower** over others.

Examples: the English words "**tyr**anny" and "**tyr**ant". Note that these people in *high* and powerful stations are eventually *brought low* by their actions.

anything that rises up and comes down upon other things.

Example: the Japanese word *"**ts**unami"*, which is an extremely high wave which crashes down.

- **QUR'ANINC ROOT REFERENCES**

Tay-Ayn-Nun = to thrust, defame/discredit, to speak ill of someone, traducing, assail, revile, scoff, pierce, spear, wound, calumniate.
Tay-Ba-Ayn = to seal/imprint/print/stamp/impress/brand/fashion, make to be dirty, rusted, covering over a thing and securing oneself from a thing entering it, adaptation/disposition to a thing, become

sluggish/lazy/indolent, to disgrace/dishonour, to have no penetrative energy, i.e. no sharpness of mind like the sword covered with much rust, load well/heavily, *tabba'a* - to impress strongly.

Tay-Ba-Qaf = to cover/overwhelm, to make a thing match/conform/suit/correspond/agree with another thing, to hit/get right, become accustomed/habituated, a thing that is equal of another thing of any kind in its measure so that it covers the whole extent of the latter like the lid, *tibaqun* - fittings, adapting, in order one above another, stages, layers, stories, series, plane, floors, stratum.

Tay-Ghayn-Ya = exceed a limit, to transgress, wander from its orbit, exceed the bound, wayward, to rise high, to overflow, to rage, go astray, deviate, be incurious, mischievous, impious, tyrannical, inordinate, rebellious, exorbitant, exceedingly wicked, insolence, injustice, infidelity, rebellion, storm of thunder & lightning of extreme severity, outburst, powers of evil, lead to evil, be overbold, contumacy, extravagantly disobedient, immoderate, corrupt, top or upper part of a mountain, idol/demon, source of wickedness.

Tay-ha-Ra = to be or become clean/pure or free of dirt, made it or caused it to be distant/remote, cleanse/wash/purify, refrain, remove oneself, to clear/clean, ablution.

Tay-Lam-Ayn = to ascend/rise, go up, learn, come on, come towards anyone, start from, climb upon, reach, sprout, notice, look, seek, examine, expose, explain, appear, inform, occur, consider, know. tal'un - the spathe or sheath in which the flowers of the date palm are enclosed, also the fruit when it first appears, fruit, ranged dates. tuluu - rising. matla'un - twilight of rising (of sun). atla'a (vb. 4) - to make manifest to anyone, cause one to understand. ittala'a for itta'ala'a (vb. 8) - to mount up, penetrate. attala'a for a'attala'a - has he penetrated (here the hamzah of union waslah being omitted after the interrogative hamzah).

Tay-Miim-Miim = to cover up, overflow, overwhelm, swallow up, fill to the brim. taammatun - calamity, overwhelming event.

Tay-Miim-Siin = to be effaced, disappear, go far away, destroy, be corrupted, wipe out, obliterate, alter, put out, lose brightness, be remote, blot out the trace of.

Tay-Ra-Ha = to cast, fling, throw, remove, reject, put it away, put at a distance, separate, make long, distance/remoteness.

Tay-Ra-Qaf = to come by night, beat something, knock, strike, tariq - one who comes or appears by night, morning star that comes at the end of the night, night-visitant, star, tariqan - way/path, line of conduct, behaviour.

Tay-Waw-Fa = act of going/walking, going/walking around or otherwise, to go or wander about, circuited/compassed, journeyed, came to him, come upon, visitation, visit, approach, drew near, to go round or round about often, encompass,

"the men/people/locusts filled the land like the TWF/flood/deluge", overpowering/overwhelming rain/water that covers,

a servant that serves one with gentleness and carefulness,

a detached/distinct part/portion, a piece or bit, a party/division/sect,

a sort of raisins of which the bunches are composed of closely-compacted berries, a garment in which one goes round or circuits, a place of going round or round about.

Tay-Waw-Qaf = to be able, be in a position to do something. taaqatun - ability, power, strength. ataaqa (vb. 4) - to be able to do a thing. tawwaqa (vb. 2) - to twist a collar, put a neck-ring on, impose a difficult task on a person, enable, hang around neck, impose, lay upon, encircle. ataaqa (vb. 4) - to be able to do a thing, find extremely hard and difficult to bear, do a thing with great difficulty. taaqat - the utmost that a person can do.

Tay-Ya-Ra = flew, hasten to it, outstripped, become foremost, fled, love, become attached, famous, conceive, scatter/disperse, fortune.

17. /Z/ Zaaw

THE PART OF THE BODY REPRESENTED

/Z/ Zaaw is **the space above the shoulder and back** which is **most exposed to sunlight** and the **lateral torso** from **beneath the armpit down to the hip bone**.

When the arms are lifted, the armpits and sides of the torso are ***exposed***, but when the arms are down, the pits and sides of the torso are ***concealed*** (kept in the *dark* or in the *shadows*).

- **ENVIRONMENTAL MEANINGS**

luminescence, *brilliance* and all things that *glow*. Conversely connotes *shaded*, *shadowy* and *gloomy* things

Example: The Arabic word "***Z****uhr*" which means midday, the point in the day when the sun is the most *brilliant*.

- **ABSTRACT CONCEPTS**

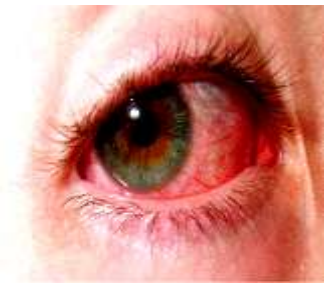
/**Z**/ are things that *go upward and rest upon* other things, that *press upon* other things, things that *ascend; tall things*, horizontally *lengthy* things; things which *appear* and *grab your attention*; to *cover and darken*, to *take down*, *keep down* or *burden*.

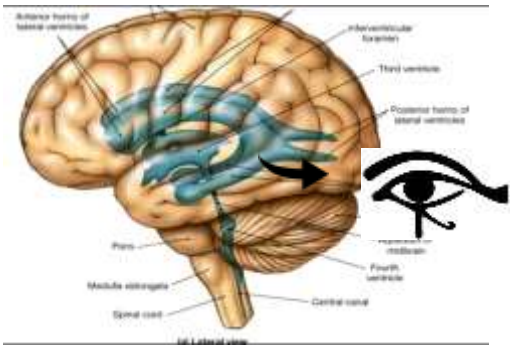
Example: the Arabic word *"**Z**ulla"* literally means *"darkness"* and figuratively means *"oppression"*

- **QUR'ANIC WORD REFERENCES**

Za-ha-Ra = to appear, become distinct/clear/open/manifest, come out, ascend/mount, get the better of, know, distinguish, be obvious, go forth, enter the noon, neglect, have the upper hand over, wound on the back.
zahara - to help/back/support in the sense of collaboration.
zihar - was a practice of the pre-Islamic days of the Arabs by which the wife was kept in suspense, sometimes for the whole of her life having neither the position of a wife nor that of a divorced woman free to marry elsewhere. The word *zihar* is derived from *zahr* meaning back.
Za-Lam-Lam = to remain, last, continue doing a thing, be, become, grow into, remain, persevere, went on doing. zallala and azalla - to shade, give shade over. zillun - shade, shadow, shelter. zullatun - awning, shelter, booth, covering, cloud giving shade, protection, state of ease and happiness.
Za-Lam-Miim = Zalima - To be dark, obscure. To give shade [shelter, protection]. A thing that covers, protects, [or shades] one, overhead.

18. /‘a/ ‘ayn





- **THE PARTS OF THE BODY REPRESENTED**

the **open** and **clear throat**, the **neck** in general and the **nape** in particular, the **eye—especially when straining**, and the **pineal organ** which sits in the center of the brain.

- **ENVIRONMENTAL MEANING**

/**‘a**/ represents things which **yoke the neck** of animals as well as by those **things which cause the eyes to strain** such as lack of sleep or diligent study.

Example: Lack of sleep can cause one to “not see straight,” while diligent study can cause someone to increase their “sight” (insight). /**‘a**/ is the *open eye* (or any orifice) representing *fullness* and *expansion* (wide-eyed). /**‘a**/ also refers to **water sources** such as a spring or fountain. Most of the words having to do with liquids going down the **front** of the neck (throat), have /**‘a**/ as the **last** letter. Most of the words where the nape of the neck is the focus, have /**‘a**/ as the first letter. Do the research!

The straining of the eye causes it to water also. We call it “welling” up. Water is a symbol of **morality** and therefore, water in the eyes can also connote *moral vision*. /**‘a**/ alludes to *understanding* and *comprehension* and is popular among many words for hearing, learning and gaining knowledge and proficiency.

/**‘a**/ is also present in many words which signify the *eyes when strained* and *obscured vision*, especially in the sense of a *flawed intellect*.

Example: Many words containing /**‘a**/ have to do with *strenuous labor* or *performance*. The popular verb “fa **‘a**la” means “to do” as well as the equally popular verb, “**‘a**mala”. The difference between the two is that, fa’ala is to perform on the *subconscious* level, while ‘amala always involves work that is acted upon as a *conscious* responsibility.

Lastly, /**‘a**/, in many cases, has to do with being strong and having courage in the face of difficulty or adversity. Along with the idea of burden-bearing, /**‘a**/ is also the letter used when lifting burdens and making things easy. The Qur’anic-Arabic phrase: ***Fa inna ma al ‘usri, yusraa*** translates as: *And no doubt, with the difficulty, comes ease*.

The idea of *compliance* or “bending the neck” is evident in words like “**‘a**bada” (to be a servant), ‘raka**‘a**” (to bend the body and bow the head in submission to an authority figure) and “**‘a**laqa” (to be affectionately devoted to).

- **ABSTRACT MEANING**

the so-called**—third eye, also known as—the single eye**

The **pineal organ** (mistakenly called – **gland**) is considered by quantum physicists to be the **center of consciousness** and the means for achieving a super-consciousness through a controlled and supervised form of meditation. Its relationship to higher cognition was known even in the days of Ancient Egypt, where the initiates inscribed pictures of the single eye among the many hieroglyphs on the walls of their sacred temples. Descartes’, in his days, described the pineal as the “principal seat of the soul”.

- **QUR’ANIC WORD REFERENCES**

Ayn-Ba-Dal = serve, worship, adore, venerate, accept the impression of a thing, obey with submissiveness or humility, approve, apply, devote, obedience, slave, keep to inseparably, subdue, assemble together, enslave.
Ayn-Ba-Siin = to frown, look sternly, austere, grim.
Ayn-Dal-Nun = to abide constantly, stay in (a place), remain, everlasting.

Ayn-Dal-Waw = to pass by, overlook, transgress, turn aside.
adwun - wickedly, unjustly, spitefully, wrongfully.
adi'yat - companies of warriors, chargers, horses of the warriors, wayfarers who run fast on their journey, swift horses.
aduwatun - enmity. udwan - hostility, injustice. aduwwan (pl. aduwun) - enemy.
Ayn-Thal-Ba = chastisement, castigate, punishment, torture, torment, retribution, abstain/desist (e.g. from eating due to excessive thirst), relinquish, quit. To deny a thing, hinder anyone from, be inaccessible, prevent.
Ayn-Jiim-Lam = to hasten, make speed, accelerate, be hasty, act hastily, hurry over, do speedily. ajalun - precipitation, haste. ajil - that which hastens away, transitory. ista'jala - to seek or desire to hasten, urge one to make haste in doing anything. ijlun - calf.
Ayn-Lam-Miim = to mark/sign/distinguish, creations/beings, world, science/learning/knowledge/information, aware/know. By means of which one knows a thing, hence it signifies world or creation, because by it the Creator is known. alim (pl. ulama) - one who is learned/wise or knows.
Ayn-Lam-Nun = to be open/manifest/public, become known, reveal.
Ayn-Lam-Qaf = to adhere to, hang, love, leech, have an attachment, cling, hold fast, pertain, catch, concern, become attached by love, suspend, fasten a thing, cleave, clot of blood, germ-cell, fertilised female ovum. alqun/ilqun - precious thing. alaqatun - true love, attachment. ilaqatun - love, affection.
mu'allaqatun - a wife whose husband has been lost to her or been left in suspense; neither husbandless nor having a husband; husband does not act equitably with her or release her; left in suspense.
Ayn-Miim-Lam = to do/make/act/work/operate/perform/construct/manufacture, practice a handcraft, be active, one who does.
Ayn-Qaf-Lam = to bind, keep back, be intelligent, become wise, understand, pay the blood price for anyone, ascend on the summit of a mountain, use understanding, abstain.
Ayn-Ra-Dad = to take place, happen, offer, present, show, propound, set before, give a hint, come against, propose, expose, review (troops), view, prepare. aruDa - to be broad, widened. arDun - goods, width. irDun - honour. urDatun - intention, target, purpose. a'raD - to turn away, back, slide, overpeer (cloud). 'ariiDz - prolonged, much, many. UrDzatun - but, excuse.
Ayn-Shiin-Waw = to go by night, be weak sighted, be night blind, withdraw, forsake. isha - commencement of darkness, early night, dusk, evening. ashiyyatan - nightpath, evening. ya'shu - to take or collect the produce of the earth, aid, succour, save, preserve, give something to someone, do some benefit to someone.

19. /gh/ ghayn

- **THE PART OF THE BODY REPRESENTED**

the **constricted throat**; also, **restricted** or **obstructed vision**.

any opening that is *clogged*, *filled*, *stopped up* or *constricted*.

The fullness of the throat is not always a negative thing as when it is filled with food…

….or

…with non-speech sounds such as whistling, humming or singing.

Example: Speech that is intended to give an *ambiguous* message also fits into the category of **/gh/**. We see this concept of inconspicuousness operating even in the English word "**gh**ost" which is an *obscured* apparition.

- **ENVIRONMENTAL MEANING**

/**gh**/ represents any desire or attraction that directs the eye towards it while blocking out the view of all things around it. It can also be any opening or passageway which admits some but blocks out others, such as the opening to one's favorite stage or screen performer's dressing room. /gh/ refers to things which are voided or empty as well as to objects that cover or veil in a way which obscures. Because intense darkness covers the night sky and obscures our vision, it is called "***gh****aasiq*". Inarticulate sounds from the throat fall under the /**gh**/ influence and are expressed through speech which is called "*lu**gh**'a*". the English equivalent to /**gh**/ is found in the hard /**g**/ sound which gives us words like *gag*, *gargle*, *gulp* and *gasp*.

- **ABSTRACT MEANING**

/**gh**/ can typify the *fullness* one feels related to having material plenty (riches). The name of the African country formally known as the Gold Coast, is **Gh**ana—meaning "rich".

Example: As a positive meaning, having the eye filled can be for good reasons, especially when talking about love…. ….as well as when discussing objectives, goals and destinations.

Riches can very often be that which obstructs our vision and can manifest itself in terms of the negative treatment by the "haves" of the less fortunate "have-nots".

/**gh**/ is connected to things *worth staring at* and also to things that are *not worth our attention* but which we stare at anyway.

We gaze at things, sometimes squinting our eyes, in order to get *purer* perception. We empty out our throats in order to provide *clearer* communication. With /**gh**/, the emphasis is often on doing what is necessary for *clarity*.

- **QUR'ANIC WORD REFERENCES**

Gh-Ba-Nun = to deceive, lose and gain mutually, cause loss, neglect a thing, attribute deficiency, cheated, deceived, overreached, defrauded, endamaged, suffer loss or damage or detriment

Gh-Ba-Ra = to be dusty, dust coloured, lag behind, gloom, remained, lasted, continued, tarried, stayed, waited, passed/went away, recrudescent.

Gh-Fa-Lam = unmindful, forgetful, neglectful, heedless, intentionally neglecting or leaving or turning away

Gh-Fa-Ra = protect, cover over, hide, shield, helmet, forgive, pardon, to ask for protection/forgiveness.

Gh-Lam-Fa = put into, to furnish with a covering, daubed, smeared, uncircumcised, enclosing, envelope.

Gh-Lam-Lam = to conceal, insert one thing in another, fraud, deceive, clad with, put upon, burning with thirst, became unfaithful, collar, shackle, fetter/bind, a thing in which one hides himself, dishonesty, insincerity, hidden hatred, revenue from the land.

Gh-Miim-Dad = unapparent, unperceived, hidden, concealed, to disdain, to shut the eyes or look away, to be low and level (e.g. the ground), mean, vile.
Gh-Miim-Miim = covered, veiled, concealed, confusedness, obscureness, calamity, misfortune, afflict, sorrow/sadness, vague, difficult. ghamaam - cloud, thin cloud, whitish cloud.

20. /f/ faa

- **THE PARTS OF THE BODY REPRESENTED**

the **nose**, **nostrils** and **lips**—when parted or split.

/f/ faa as the nose, splits the face in half; the nostrils split the nose in half, the septum splits the nostrils into halves and the two halves of the lips split to form an opening. **/f/** appears in many words dealing with the 'lips". The Arabic word "**afa**" means "open mouth".

- **ENVIRONMENTAL MEANING**

/**f**/ is represented in living things that **cleave** and **breathe**, such as the earth and the sunrise, which are called "**f**alaq" and "**f**ajr" respectively. We speak about a new day as "breathing" and *bringing new air*.

Example: **/f**/ is found in entities that *split*, *divide*, *open* and provide *vertical distance* such as pipes, funnels, chimneys and spouts. It appears in Arabic words for tips, borders, edges and bounds as well as for hurriedness, velocity and speed. We have all at one time or another, experienced a "runny" *nose*. /f/ is primarily anything which *sustains life by breathing*. Things that *release*, *escape*, *emit*, *eject* and *empty out* (especially air) are included. **/f/** can include many things that are *rotten*, *decayed*, *putrid* or *pungent*.

- **ABSTRACT MEANING**

/f/ can refer to the nose being clear and open, corresponding with *understanding* and *native intelligence* known as **intuition**. In the absence of help from the intellect, we are sometimes

advised to *follow our noses*. Ex: **fahm, faqh, fakir, 'araf, fTn, fusHa, Hanif** are all processes in the brain that sharpen the **intuitive urge.**

In the sense of one "turning their nose up" to someone else, /f/ appears in several words dealing with **haughtiness**. The idea of being "nosey" or "snooty" is connected to /**f**/'s references to *investigation* and *arrogance*. The "space" in terms of *vertical distance* suggested by /**f**/ is measured by **below** and **above** (as is the vertical nose), as opposed to side by side, and again, lends to the idea of being "above" others.

The space between where the nose attaches and its tip is a measureable distance. In the medial (adjective) position, /**f**/ often times refers to the **slimming** or **tapering off** property of the nose, implying ***f****limsiness*, ***f****loppiness*, *droopiness* and even ***f****ragility*. A popular punishment for dogs was to hit them on the **snout** with a newspaper. A lightweight situation is inferred in /**f**/, which connects with the meanings of ***f****oolish*, *inconsequential* and *trivial*.

In a few instances, /**f**/ suggests that which is **plain** or **obvious** as the nose on one's **f**ace.

- **QUR'ANIC WORD REFERENCES**

Fa = A prefixed conjunction particle having conjunctive power. It implies a close connection between the sentences before and after it. This connection may be either definite cause and effect or a natural sequence of events signifying: and, then, for, therefore, so that, so, in order that, in that case, in consequence, afterwards, at least, lest, because, for fear of, truly, after, by, but, thus, consequently, in order to. It is also expletive and a prefix to other particles, e.g. fa-amma, fa-anna, fa-inni, fa-aina etc.
Fa-Alif-Ya / Fa-Alif-Wa= to split/clave/smote/strike, it became cracked/open/split.
An interval, low/depressed place (usually surrounded by mountains).
A party/portion/division, distinct body, company or congregated body.
Fa-Dad-Dad = to break/perforate/destroy, to separate/disperse/scatter/distribute, broke it up, silver, to make wide/ample/large/liberal, small number of men in a state of dispersion, calamity/misfortune.
Fa-Dad-Waw / **Fa-Dad-Ya**= become wide/spacious/empty/vacant/void, it reached a thing/person, reach one another, to communicate / make known, to mix, share in common.
Fa-Jiim-Jiim = wide apart, part something widely, open it widely, the making an interval/opening between two things, a wide road between two mountains, depressed road, wide and conspicuous road, opening/intervening space, disorderly/much talking/babbling, valley, wide valley, cleft ground, ravine.

Fa-Jiim-Ra = cut/divide lengthwise, break open, vent, incline/decline/deviate, dawn/sunrise/daybreak, source, abundantly and suddenly, ample bounty/generosity, a place from which water flows.
Fa-Jiim-Waw = opening, set apart, open wide, a fissure.
Fa-Kaf-Kaf = open a thing, create a gap/breach/break, separate, set loose or free, let go, liberate, release, emancipate, to assist, dislocated/disjointed, aged/old/weak man.
Fa-Kaf-Ra = thought upon it, considered it in order to obtain a clear knowledge of it, examined it (mentally), to employ the mind, having much thought, reflect.
Fa-Lam-Ha = cut/slit/crack/split/fissure, furrowed/plough/cultivate, agriculture, till the ground, to prosper be successful, attain/acquire, become fortunate/happy, become independent, permanence/lastingness/duration.
Fa-Lam-Qaf = it became split/cleft/cloven/cracked, divided it lengthwise, fissure, longitudinal division, daybreak/dawn, uttered/performed what was admirable/wonderful, to strive/exert, become big/bulky/fat/plump, whole creation, all beings/things that are created, a piece/fragment broken off, the cleaver.
Fa-Qaf-ha = to be learned, skilled in divine law, endowed with penetration, understand a thing.
Fa-Ra-Ghayn = to be empty, vacant, to finish a thing, cease from, be unoccupied, be free from (other things)
Fa-Ra-Jiim = To open, separate, cleave, split, enlarge, part, let a space between, make a room, comfort anything in, dispel cares. An opening, intervening space [gap or breach] between two things. Ex: Parting hind legs or intervening spaces between fingers.
He opened, made room, ample space.
Fa-Ra-Qaf = to separate/distinguish/divide/split/decide. farqun - the act of distinction or separating. fariq - who separates, discriminates. firqun - separate part, heap. firqatun - band of human beings. fariqun - part/portion, some party or band of human beings. furqan - criterion of right or wrong, draft, evidence or demonstration, a name of The Quran, aid, victory, argument, proof, dawn, distinction.
faraqa (vb. 2) to make a division or distinction, make a schism. tafriq - division, dissension.
Fa-Sin-Dal = to become evil/corrupted, invalid, decomposed, bad/spoiled/tainted, wrong, vicious, make mischief or foul deal. fasad - corruption/violence.
Fa-Sad-Lam = he separated/divided or put apart a thing from another thing, made a separation/partition, distinct/plain/clear/manifest, explain in detail, to distinguish, deciding between two things (e.g. what is true and what is not), distinct portion/section.
Fa-Ta-Ha = to open, explain, grant, disclose, let out, give victory, conquer, judge, decide, ask for assistance/judgement/decision, seek succour/victory. mafatih (pl. of miftah) - keys/treasures.

Fa-Tay-Ra = to create out of nothing, cleave/split/crack/break, be broken into pieces, cleave asunder, begin to create. fitrat - natural disposition or constitution with which a child is created. The faculty of knowing God and capability of accepting the religion of truth, religion. fatir - creator, one of the names of Allah. futur - crack/flaw. munfatirun - split one, cloven one, one rent asunder.

Fa-Waw-Ra = to boil, boil over, gush forth, run, do in haste, rush, come in a headlong manner, be raised, be in a fit of passion, be in a hurry, come instantly, come immediately, fall of a sudden, make a sudden rush.

Fa-Ya-Dad = to be copious, overflow, abound, flow freely, spread. afada - to pour, proceed, return, be immersed in any business or communication, go from a place to another in a crowd. (it is both transitive and intransitive).

Fa-Ya-Lam = Weak and erroneous judgement or opinion, erring in judgement/insight, to magnify oneself and become like an elephant, showed a morose aspect, elephant, (it) increased, to become fat/big like an elephant, Heavy (or dull) and low, ignoble or mean, keeper/master of the elephant.

21. /q/ qaaf

- **THE PART OF THE BODY REPRESENTED**

the **location of the heart in the breast**; **the back of the head**, and the **feet as tools of measurement**

The name for the heart is ***q****alb* and the heart is known for ***measuring*** out our life time as the body's ***timekeeper***. The heart also occupies a **lofty** and **authoritative** place in the body's structure and therefore signifies *power* and *dominance*.

/q/ also refers to the **back of the cranium**. The back of the head is where the **subconscious mind** is thought by some to reside and the subconscious mind is known to control **memory** and **emotions** which are two of the most powerful perceptions captured by the brain. The memory and emotions can be *dissected*, *chopped up* and *broken into pieces*, so to speak. We have all heard of having *choppy memory*. Can anyone say "Sybil"? She was known to have had 16 different personalities.

/**q**/ is also indicative of any *hallowed out* space such as the **chest cavity** or the **back of the skull**.

The Arabic word *"**q**adam"* means both *"foot"* and *"ancient"*. It means **foot** because it takes you forward in sequenced steps, but can also mean **ancient** because its footsteps leave behind *footprints* and footprints represent traces of that which has since *passed*.

The **foot** embodies that same association to *measurement*, *power* and *dominance* (think about armies *marching* into battle), and just as the heart is the major control over the life force of the body; the foot has on its underside, energy connections to each and every major organ of the body. Any reflexologist can provide for you detailed diagrams of the foot and all of its *sections*. You can actually press on a given *subdivision* and it will have a possible healing effect on the corresponding internal organ.

- **THE ENVIRONMENTAL MEANING**

Example: Most domesticated beasts are distinguished by their stomachs (in fact, the cow has one stomach but with four different compartments!), however, most **birds** are distinguished by their **torsos**. /**q**/ is connected to **anything shaped like a ribcage**, particularly birds with their **expansive breasts**.

/**q**/ additionally refers to things which are ***cut up*** or ***dissected*** as well as to things that are *clipped*, *divided*, *pierced*, *split*, *chopped* and *broken into fragmented pieces*. Hmmm. All of that sounds like birds to me!

/**q**/ deals with *measurements* and *distributions of shares*, *equity*, *compensation* as well as *decrees*, *claims* and *values*. /**q**/ refers to things which exist in a framework, that which can be divided and regulated, that which is parceled out, as well as that which can be trampled upon.

Just as a bird gathers morsels of food and pecks, /**q**/ also alludes to *pinching*, *gathering*, *collecting* (as a bird collects straw) and *assembling*. Making a nest is *settling in* just as a **settlement** is called a *dwelling place*. The Arabic root word letters for *settlement*, *town* or *city* are "**q** r r, **q** r y and **q** t n". The word "**Q**ur'an" itself is from **q***ara'a* which means **to read** but also, to **collect and assemble**.

The stride of the foot moving forward gives us *rhythm*, *power* and *measured sequencing*. The 12 inches of a ruler (called "foot") was more than likely based on the actual measurement of a person's foot.

The Arabic word *"**q**iyyam"* means to *"stand on two feet"* and in doing so, the heart becomes *elevated* (like a perched bird).

Feet move in *sequence*. The Qur'an says that the moon *follows* the sun in its courses. It is a **poetic** depiction of the moon taking on foot motion. The Arabic word for moon is *"**q**amar"*.

- **ABSTRACT MEANING**

  We mentioned above that the Arabic word **q**ara'a means **to read** and reading involves taking a **collection** or *sections* of words and **assembling** them for **distribution** throughout the brain.

Example: Words end up in the *subconscious* memory bank and can be recalled (re-assembled). Any information that can be memorized becomes *close to the heart*, whether it is positive or negative. /**q**/ speaks to things that are *heartfelt* (such as close relationships) and, like the heart, /q/ refers to things which are of *core* and *central* concern. They can be *core love affairs, core beliefs, core curriculum, core employment* or *core ideas*.

- **QUR'ANIC WORD REFERENCES**

Qaf-Ayn-Dal = to sit down, remain behind, to hold back, to tarry, lie in wait, sit still, remain unmoved, desist, abstain, refrain, lurk in ambush, set snares, neglect, act of sitting, foundations/bases, women who are past child bearing age, elderly spinsters past child bearing age, one who sits at home, one who sits still, seat or place of sitting, station, encampment.
Qaf-Ayn-Ra = to dig deep, descend, sink, reach the bottom, cut empty, cut from the root, crush. taqa'ara - to be hollow, deep, felled. inqa'ara - to be uprooted. munqa'ir - that which is torn up by the roots, uprooted one, uprooted and hallowed.
Qaf-Ba-Daad = take with hand by actual touch/feel, close, grasp, clutch, seize, contract/draw/collect together, take posession, with reference to birds = contract their wings, quick in flight/pace.

Qaf-Ba-Ra = to bury (the dead). aqbara - to cause to be buried, have a grave day, have anyone buried. Grave, tomb, intermediate state in which the soul lives after death till the resurrection. maqabir - cemetery, place of burying.
Qaf-Dal-Dal = to rend, cut, tear, pull sharply apart. qaddat - she rent. qidad - parties of men at variance among themselves, companies of diverse and different (way).
Qaf-Dal-Miim = to precede, come forward, head a people. qadima - to come, return, come back from, turn, advance, set upon, betake one's self. qadamun - merit, rank, precedence, human foot, footing, foundation, example, strength. qadama sidqin - advancement, going forward in excellence, footing of firmness, strong and honourable footing, true rank, precedence of truthfulness. qadim - old, ancient. aqdamuna - forefathers. qaddama (vb. 2) - to bring upon, prefer, send before, prepare beforehand. taqaddama (vb. 5) - to advance, proceed, go forward, be previously (done or said), bring upon, send before, put forward (a threat), (threaten) beforehand, obtrude (opinion), be promoted, proposed, surpass, outstrip any one. istaqdama - to desire to advance, wish to anticipate, advance boldly. mustaqdimun - one who goes forward or desires to advance, who goes ahead, who lived before, foremost.
Qaf-Dal-Ra = to measure/decree/determine/stint/straiten, to have power, to be able, a measure, means, ability, a term/decree, doom, destiny, measured, decreed.
Qaf-Dal-Siin = to be pure, holy, spotless. qudusun - purity, sanctity, holiness. al quddus - the holy one, one above and opposite to all evil, replete with positive good. muqaddas - sacred. An earthen or wooden pot.
Qaf-Fa-Waw/Ya = to go after, to pursue, walk behind, follow in the track of, follow the footsteps of, to cause to follow or succeed.
Qaf-Lam-Ba = To turn, return, repentance and grief, turn a thing upside down, change, change direction, turn it about to it's face and back, turn inside out, change condition.
qalb = heart. mutaqallabun - time or place where any one is busily employed. munqalabin - place or time of turmoil, reverse, turn, the end. munqalibun - one who returns.
Qaf-Lam-Miim = to cut, pierce. qalam - pen, headless arrow used in casting lots.
Qaf-Miim-Ra = to be white. qamarun - moon (especially from the 3rd to 26th night).
Qaf-Nun-Ayn = to be content, satisfied with what is within one's approach, not looking for more, beg with some reservation, beseech earnestly. qani'un (pl. qunna'un) - one who is deserving charity but does not beg, content. muqni'un (vb. 4) - one who lifts up the head. aqna'a - to raise (the head), outstretched neck.
Qaf-Nun-Ta = to be devout, obedient, fully and wholeheartedly in all humility to stand long in prayer. qanitun - one who is fully, wholehearted and in all humility devout and obedient.
Qaf-Ra-Alif = to recite/read, compilation, collection, reading, recitation, explanation, study, investigation.

Qaf-Ra-Ayn = to knock, strike, beat, hit the butt, gnash (the teeth), strike with severity. qari'atun - great calamity that destroys a nation, adversity that comes suddenly, a name of the day of resurrection, great abuse.
Qaf-Ra-Ba = to be near to, approach, offer, be near in relationship or rank, be at hand, draw near. qurbatun - proximity, means of drawing nigh, kindred, relationship. qurubatan (pl. qurubatun) - pious works and good deeds which draw people nigh to Allah, means by which an approach is sought. qaribun - night, near at hand (either in time or place). min qaribin - soon after. qurba - affinity, relationship. qurban - sacrifice, offer made for God, means of access to God. aqrabu - closer, closest. aqrabun - kinsfolk, kindred, those most nearly related. qarrab (vb. 2) - to set before, cause to draw nigh, make an offering, offer (sacrifice). muqarrabun (pl. maqarrabuna) - one who is made or permitted to approach, who is brought nigh.
Qaf-Ra-Dad = to cut, turn away from, severe, do good deed.
Qaf-Ra-Ra = to be or become cool, remain quiet, be steadfast, be firm, refresh, be stable, be firm, receive satisfy, affirm, agree, settle, last. qarar - stability, a fixed or secure place, depository, place ahead. qurratun - coolness, delight. aqarra (vb. 4) - to confirm, cause to rest or remain. istaqarra (vb. 10) - to remain firm. mustaqirrun - that which remains firmly fixed or confirmed, in hiding, is lasting, which certainly comes to pass, which is settled in its being/goal/purpose. mustaqar - firmly fixed/established, sojourn, abode. qurratun - coolness, refreshment, source of joy and comfort. qawarir (pl. of qaruratun) - glasses, crystals.
Qaf-Ra-Shiin = to cut off, curtail, he gained/earned/acquired and collected (for his family). Big fish, victorious, name of an Arab tribe descended from Abraham of which Muhammad's grandfather was the chief.
Qaf-Ra-Ya = To entertain a guest, that with which a guest is entertained. To collect, run to/into. To explore; investigate; with a much and diligent search, city/town.
Qaf-Siin-Miim = to divide, dispose, separate, apportion, distribute. qasamun - oath. qismatun - partition, division, dividing, apportionment. maqsumun - divided/distinct. muqassimun (vb. 2) - one who takes oath, who apportions. qasama (vb. 3) - to swear. aqsama (vb. 4) - to swear. taqasama (vb. 6) - to swear one to another. muqtasimun (vb. 8) - who divides. istaqsama (vb. 10) - to draw lots. tastaqsimu - you seek division.
Qaf-Sad-Miim = to break in pieces, shatter, demolish utterly, destroy completely.
Qaf-Sad-Sad = to impart, tell/communicate/narrate/recount, follow one's track, retrace, retaliate, cut off, relate, declare, make mention of. qasasun - narrative, act of following. qisas - just retaliation.
Qaf-Sad-Waw = distant/remote, far, go far away. quswa - more remote, further.
Qaf-Tha-Alif = to eat a thing that makes sound and crunch under the molar teeth while chewing, for example while eating cucumber, to abound in cucumbers. qiththa - cucumber.

Qaf-Tay-Ayn = to cut/sever/disunite/separate/detach, to disable in prosecuting, unable to proceed in, withdrew, break down, perish/cease/finish/fail, cut short / stop, intercepted/interrupted, put an end/stop to, a piece/bit/part/portion cut off from a whole, herd, distinct portion.
Qaf-Tay-Tay = to cut, mend, make portions. qittun - portion, share.
Qaf-Waw-Ba = to dig a hole like an egg, draw near, fly away. qab - space between the middle and the end of a bow, portion of a bow that is between the part which is grasped by the hand and the curved extremity, space of one extremity of the bow to the other, short measure of space/length/distance (often used to imply closeness of relationship).
Qaf-Waw-Lam = to say/speak, to call, to be named, word/speech, utterance, a thing said, greeting, discourse, one who says/speaks. To inspire/transmit/relate/answer/think/profess, emit an opinion on, indicate a state or condition or circumstance. qa'ilun - speaker, indicator.
Qaf-Waw-Miim = stand still or firm, rose/stand up, managed/conducted/ordered/regulated/superintended, established, made it straight/right, maintain/erect/observe/perform, set up, people/community/company, abode, stature/dignity/rank. aqama - to keep a thing or an affair in a right state.

22. /k/ kaaf

- **THE PART OF THE BODY REPRESENTED**

  the **closed hand / palm** as it **holds**, **seizes**, **snatches**, **clenches**, **grasps**, **clutches**, **grabs**, and **manipulates**.

Because items, when held in the palm, can be entirely enclosed, **/k/** has also come to signify **wholeness** in the sense of an entire thing being **encircled**.

- **THE ENVIRONMENTAL MEANING**

  /k/ represents things that are *fixed*, *secure*, *rigid* and *immoveable*. **/k/** in multiple cases, has to do with *physical shapes* that ***capture*** or ***conceal***. In Arabic, a ***k****afir* in the traditional sense, is a *farmer* who conceals the seed beneath the soil. A **k**afir in the religious sense, is a *disbeliever* who buries (covers, smothers) the truth beneath the soil of the soul. A gardener is known to *work the soil*. **/k/** also deals with things we *feel*, *rub*, *massage*, or *work with the hands*.

Example: In the general sense of holding things, **/k/** also signifies **other parts of the body used for holding**, including the *hips*, *beltline*, *thigh*, *back* and *shoulders*.

To write is to inscribe using the hand. The Arabic root letters for *writing* (**k**ataba)…..
…and *book* (**k**itaab) are **k t b**.

The Arabic word for dog is ***k****alb*, and dogs are sometimes used to *detain*. The African American is acutely aware of that. For those who are clueless, simply study the history of American-style slavery and its evil twin, Jim Crow. The dog must also very often be *restrained*.

Example: /**k**/ refers to things *preserved*, *hidden*, *buried*, *suppressed*, *hung*, *draped* (think **c**urtain), *guarded*, *propped*, *supported* or *held within a sphere*. A forty-five degree angle is a part of a circle and we assume it during *salaah* (formal prayer) In addition, the root letters for *wholeness*, *completeness* and things **spherical** are **k** m l and f l **k**.

Nodes and **knots** also fall into the category of /**k**/ because of their spherical *resemblances*. Our an**k**le is a good example of that. In Arabic the ankle is called *"**k**a'aba"* (**k**a'abayn for two an**k**les). It is the exact same word for the house used for *circumambulation* (circling) in Makkah, Arabia during the annual Hajj (Pilgrimage) or Umra (modified Pilgrimage) seasons. The **K**a'aba is a protrusion much like the ankle and the **K**a'aba has circular designs in the ground around it and circular motions of people around its *circumference*. The Ka'aba has *captured* the imagination and the curiosities of over 1.3 billion Muslims around the world, however, it is interesting to note that nothing is held **captive** *within* it!

The word *ka'aba* in the ancient Arabic vernacular, also alludes to "***breasts swelled with milk***" which highlights the idea of a protrusion (nipple) in the middle of a circle of fatty tissue—akin to the Makkan **K**a'aba which is itself, a protrusion in the middle of circles (of people). Author's note: If you are a member of the "haram police" and cannot deal with the accompanying picture then you are reading the wrong book.

- **ABSTRACT MEANING**

As an **abstract** idea, /**k**/ is related to the use of **comparative analysis**. Ancient people used the hands in order to weigh one thing against another.

Example: In the Arabic language, /k/, when prefixed to a word, serves as a **comparative preposition** and signifies *as, like*. The hands are the two *mirror-image* parts of the body we compare the most. It could also be based on the custom of weighing things using *opposite hands* to see which objects weigh the most. When the human mind **ponders** in order to give consideration to the *weight* of an *issue* or *concern*, it is utilizing this same principle of determining the best value or decision. When we are in decision-making mode, we refer to it as "chewing" on an idea and chewing is eating. The Arabic word for *eat* is "a**k**ala" and after swallowing, the stomach *captures* the food for processing. In this regard, the letter /**k**/ also relates to things *seized*, *afflicted*, and even *tormented*.

/**k**/ is to compare two things *side by side*. The Arabic word *"**k**afaa"* means *"equal"*. In the Qur'an, the Arabic statement: ***K**ufuwan ahad* means *No comparison*. The words for *wisdom*, *judge*, *decision* and *judgment* are from the Arabic root letters H **k** m. In order to judge correctly, you have to *weigh two things* against each other and make a decision for the best.

The root letters **k** l m indicate *word*, *speech* and *statement*, however, the communication must be **complete** and comprehendible. The letter /**k**/ as the palm of the hand indicates having a *thorough* hold on something.

The hand is a symbol of the human mind and its ability to weigh the "heaviness" of information. Just as the hand has **five fingers**, the mind operates based on **five senses**. Our senses "snatch" and "capture" information from the environment so that our intellect can *manipulate* it in a way that will make it work for us. When *understanding* dawns in the intellect, we say that we have "grasped" the knowledge. It is then that we can claim to *possess* the *entire* picture and /k/ refers to things **whole**, **complete** and **comprehensive**.

- **QUR'ANIC WORD REFERENCES**

Kaf-Alif-Siin = drinking-cup when there is in it something to drink. Sometimes it can refer to the drink itself, e.g. wine. Sometimes used to signify every kind of disagreeable/hateful/evil thing. If there is no beverage in it, the drinking cup is called *Qadehun* (root: Qaf-Dal-Ha).

Kaaf-Ayn-Ba = swell/prominent/protuberant/projection/budding (common examples include a woman's breasts), jointed-stem, fold, went away, joint/juncture/division of bones (more commonly the ankle bone), tarsus (in animals), swift, eminence/nobility/glory, anything elevated, square/cubic house/chamber, square-form, to hasten, to go away paying no regard to anything

Quote from Lane's lexicon: "*a house or temple belonging to the tribe of Rabee'ah, who used to compass it, or perform circuits round it (as is done round the Kabbeh of Mekkeh)*".

Hans Wehr - Knot, knob, node (of cane); joint, articulation, ankles, anklebone; heel (of foot or shoe) ferule; die; cube; high rank, fame, glory, honor.

Everything that the male of the form fa'lun (being the representation of the Cl. Arabic form in question, universally applied to all roots) can mean, so can the female (fa'latun or modernly and colloquially fa'lah), with the added meaning of emphasis that the feminization of the word gives; where it is clear that there could be intensification. The female form can be found in 5:95, 5:97.

Kaf-Ba-Ta = To abase, throw down, restrain, overwhelm, prostrate, expose ignominy, humble, vanquish with humiliation, be laid low and humbled, cause to perish, deny a person what he desires, to disappoint a person, to be enraged and grieved, restrain one's rage in his inside or bosom, smite or hurt one's liver, fall prostrate upon one's face.

Kaf-Dal-Ya = To restrain, detain, give little, stop hand, be niggardly.

Kaf-Fa-Alif = To equal, compare.

Kaf-Fa-Fa = To withhold, desist, refrain from, withdraw, keep back, hold out the hand.

Kaf-Fa-Ra = to conceal, to cover, to reject, to disbelieve, to be thankless, unthankful, ungrateful, to disown, deny, faithless, black horse, dark night, tiller/farmer.

Kaf-Fa-Ya = To be enough, sufficient.

Kaf-Nun-Siin =Setting planets.

Kaf-Ra-Ra = To return to, return successively, run against, repeat, come back, follow by turns, be wound (thread), repeating once or more than once, a rope (made in the form of a hoop) by means of which one ascends a palm tree.

Kaf-Ta-Ba = he wrote it, to dictate it, prescribe/appoint/ordain, judged / passed sentence / decreed, drew/brought together, collected, conjoined / bound, he sewed it, what is written (e.g. of law), mode/manner of writing, book, bookseller, a thing in which or on which one writes, record/register/writ, revealed scripture, a writer/scribe/secretary, an army/military force, troop.

Kaf-Waw-Ba (Kaf-Alif-Ba) = To drink out of a goblet. A mug or drinking cup without a handle, slenderness of neck with bigness of head, a sighing or grief or regret for something that has past or escaped one. A small drum slender in the middle or small stone such as fills the hand.

23. /l/ laam

- **THE PART OF THE BODY REPRESENTED**

the **tongue** as a f*orm* [physical part of the mouth] as well as a *function* [used for tasting and talking]. **/l/** is the one letter which identifies *language* in and of itself. You will understand this statement better after reading about all of the fantastic connections in this Fitrah-based sound. The letter **/l/** happens to be the most used letter in the Arabic alphabet!

Example: In Arabic, the word for *tongue* is "**l**isaan" and the tongue is the major tool of *communication*. The Arabic word "**l**ugh" means "speak" and the Arabic word "**q**ul" is a command form verb meaning "to say".

Example: A trouble word like "dajjaa**l**" (depicted in Is**l**amic **l**ore) would cease to be a puzzlement just by understanding the role of **/l/** as it is connected to communication. The word is from the root letters d j l which means *to dupe, be false, swind**l**e, to be an imposter* and a *char**l**atan*. When you add the idea of "communication" to this, one can clearly see that it has to do with—not a person—but a *system* of which in our day should be identified as television and internet. Now, let's see how good you are at saving your children from the "**Great Dajjaal**," thought by some in the Islamic world to be a terrifying "one-eyed monster" false messiah that is to wreak havoc upon the earth immediately preceding the "Day of Resurrection". Grow up already. That is exactly what the television has become for many of you. Check the CBS logo below for verification.

They have also designed the television and computer screen to keep your "third eye" (pineal gland) calcified and therefore, deactivated.

/l/ is a primal sound made by human infants very early in their development. Many parents have heard the joyful sounds of "**l**a, **l**a, **l**a" coming out of their children's mouths. A popular R&B singing group called the "De**l**fonics" recorded a hit song back in the seventies called "**L**a, **L**a Means I **L**ove You". The lead singer and songwriter (who by the way is a Muslim) stated that he got the idea from listening to his one-year-old as she sat smilingly while making "la, la, la, la" sounds with her tongue. He understood those resonances to be her way of expressing love, joy and **connectedness**. Keep in mind that, this is also the age when the child **clings** most to its parents, especially the mother. The tongue also clings to the roof of the mouth.

- **ENVIRONMENTAL MEANING**

  /l/ refers to situations which share characteristics with the tongue such as things ***l**oose* or *re**l**eased*, ***fl**oppy* or *droopy*, ***l**imp* or ***l**imber*, ***l**iberated*, ***l**inked* or ***l**azy*, as well as to things *connected* and *extended*. A popular subway train **l**ine in New York City is called the "**L**" line and it **connects** with numerous other train lines which take you to multiple points throughout its five boroughs.

Example: The idea of being extended also applies to the Arabic word, "ah**l**" which means "fami**l**y"—but not the nuc**l**ear mother, father, chi**l**d mode**l** we have been so**l**d. "Ah**l**" means "extended" family. In fact, G_d uses the term "***ahl-il-kitaab***" (family of the Book) in the Qur'an to describe the *extended* re**l**ationship of those who profess be**l**ief in One Creator.

Example: Like the tongue, **/l/** is indicative of things that are ***l**ong*, ***fl**exible* and ***fl**owing* such as "**l**abisa" [clothes], "ja**l**abiyy" [**l**ong robe] and "**l**ahm" (flesh that can still be *stretched*). To extend the list of /l/ connected stuff are things that *c**l**eave*, ***l**ink*, ***l**asso* and ***l**ash*. One of the more prominent meanings for **/l/** is connected to things that *stick*, *attach* or *adhere*. The In fact, the Arabic word for "**l**eech" is "a**l**aq".

In several Semitic languages, the letter "**L**" means "**shepherd's goad**" and this was the **staff** that would be *extended* when *pointing the way* for sheep to go. The shepherd would use the hook end to pull his sheep away from danger and would use the straight end to point the direction he wanted his sheep to go in. In the Arabic language, the **/l/** has also been used to mean ***being for***, or ***going to or towards a thing***.

If you turn this picture upside down, you will have what resembles the Arabic letter **laam**. The Prophet Musa (Moses, peace be upon him) had one of these. Musa spent most of his career instructing his "**lost sheep**"

(Children of Israel) as to what *not* to do. The words *la* and *lam* also came to mean "*no*" and "*no*t" respectively.

Musa (peace be upon him) was also the only prophet who had an issue with his *tongue*. He even prayed to G_d that He would remove the "knot" (not?) from his tongue so that he would be successful in addressing the "baddest dude" of his day—Fir'awn (Pharaoh). G_d granted Musa his prayer and Musa subsequent**l**y became one of the most e**l**oquent orators of his day in the face of his fiercest foe, Fir'awn.

Based on my study, I am convinced that the goad became a replacement for what earlier had to be the human voice (tongue) shouting instructions at the sheep. Human beings are always looking for the easier way, especially those in positions of power and authority—and hence, the creation of the **walking stick**, carved from the wood of the tree.

- **ABSTRACT MEANING**

When we think about the **abstract** meaning for the tongue and the word "taste," we think about **discrimination**, however, discrimination is not necessarily a negative word. We can just as easily discriminate against things which could be to our detriment. To discriminate is merely to draw *separations* and *distinctions* between things. American English first records this word in the adverse (racial) sense in 1866.

> The tongue is always differentiating tastes and f**l**avors and chooses the pa**l**atable over the inedib**l**e. The tongue, abstract**l**y speaking, can also become *sour*, *sarcastic*, *bitter*, ***l**ambasting* and *biting* and it is in *those* cases that discrimination becomes an undesirab**l**e trait. In the Qur'an, there is the depiction of a certain dog who **l**o**ll**s out his tongue. The dog's hanging, dripping tongue is ca**ll**ed "***safa**l**a***" and it will do that for venti**l**ation when hot. So, in some cases, the tongue is used for *venting*. Aha! But only for those on that particu**l**ar **l**evel of emotiona**l** expression.
>
>
>
> The dog's tongue will **l**iterally fa**ll** down out of its mouth until it cannot fa**ll** any further. I'm sure you know some peop**l**e who misuse **l**anguage in the very same way. When they get heated, they search for the **l**owest, fi**l**thiest, most sarcastic sounding words they can find and *spit* them out—and without regard for who's around them. Your elders, your wife, their teachers, young chi**l**dren—it doesn't matter. And some of our teenagers are the worst vio**l**ators of this bad **l**anguage disease which is actually a virus that has spread across the **l**ength and breadth of our American communities. As the Spinners once sang—"It's A Shame". This **l**ow **l**eve**l** of

communication indicates corruption in the *heart*. The word **dog** (ka**l**bun) and the word **heart** (qa**l**bun) are grammatica**ll**y re**l**ated. Hmmm.

On the positive side, *taste* is related to **moral discretion** and **discernment** as well as to **moral guidance** inasmuch as the tongue is used to issue direction. The handsome man to the right, Imam W. Deen Mohammed (shown here in his younger years, may G_d be pleased with his work among us), was the perfect example of morally-guided speech put to excellent use.

Example: In order to pronounce the **l**etter **/l/**, you have to raise your tongue to your top pa**l**ate. Here is the take-home message: the tongue (language) is created by G_d to be lifted! The raising of the tongue is a part of your Fitrah; lolling it out is not. As I stated earlier—it's for the dogs. The human tongue should agree to be discip**l**ined. In doing so, it **l**eaves the company of "**l**oose **l**ips" for the preferred practice of consciousl**y** and carefu**ll**y cu**l**tivated conversations. When these convos are designed *specifica**ll**y* to p**l**ease the Creator, then this behavior becomes what is called a "Hab**l**" or "rope" that restrains us from bad thoughts and bad feelings which can lead to wrong speech and evi**l** actions.

/l/ is used for count**l**ess words that have to do with *e**l**evation* and *loftiness*. The root letters for mountain are j b **l**, for hi**ll** it is t **l l**, for being first and foremost it is a w **l**, and for transport, it is H m **l** which is a**l**so where we get the word for "pregnant" (ham**l**). That shou**l**d te**ll** us that the carrying of new life during pregnancy is a *high* honor with G_d, not a curse as some postu**l**ate.

We stated earlier that "water" is a symbo**l** for "mora**l**ity" and the tongue is consistent**l**y *moist*. Maybe that is a sign from the Creator that human communication was meant to be continua**ll**y cognizant of mora**l** direction. I'm just guessing.

A popu**l**ar companion of Muhammed the Prophet (peace and prayers be upon him) was an Abyssinian named "Bi**l**a**l** ibn Rabah" (may G_d be p**l**eased with him) and Bi**l**a**l**'s name is connected to the idea of *moisture* and *freshness*. His primary ro**l**e was to ca**ll** peop**l**e to the dawn prayer (called "fajr"), which incidenta**ll**y, is when the air is at its freshest. His secondary ro**l**e was as the community treasurer.

Bilal's call to the **salah** (ritual prayer) was balanced by his call to the **falah** (successful cultivation), and *agriculture* is the forte of the *farmer*. What does the husbandman depend on the most after tilling the soil and planting the seeds in the sunshine? Water! Bilal was a symbol of what is necessary for the true cultivation—not of the ***l****iteral* soi**l**—but of the *figurative* soi**l** of the human "sou**l**". The sou**l** needs *mora**l** insight*, *mora**l** integrity* and *mora**l** commitment*—not on**l**y in the area faith, but a**l**so in the area of finance. By *moral*, we are not talking politically or self-righteously; by moral we only mean **decent**. And being *decent* is in our human *descent*. Do you hear how a**l**ike those two words sound? If you want to know what that decency **l**ooks like, then study the Fitrah of every newborn baby. G_d has preserved that picture of our origina**l** human decency in their behavior. G_d says in the Qur'an: **He created us from water**. Think about it.

The letter /l/ has many connections pointing to the idea of good hea**l**th. The first thing a doctor will do is ask you to "stick out your tongue". There are many things that can be determined about your health through examining your tongue and inner mouth. Likewise, there are many things to learn about a person based on their use or misuse of the tongue and language. The Arabic greeting word "sa**l**aam" is a hint that Muslims should wish for each other, not only peace, but "hea**l**th" and "who**l**esomeness". The Arabic word "sa**l**iH" is another great example. It means "righteous" but not in a "goody two shoe way"; it means to be good in a way which contributes to your mental, moral and spiritual **fitness**.

The best example of health is when G_d sends a "*rasoo**l***" (apost**l**e/messenger). A *rasool* is one who *transmits*, *sends out* or *releases* a transmission. This "*messenger*" (a weak English word but we will use it for now) is sent with both good news as well as warning. The "good news" (called "gospe**l**" by the Christians) is for those who choose to ascribe to hea**l**thy, G-d-conscious **l**iving through the exercising of faith and good works; and the "warning" is for those who *refuse to exercise*. Yes. Your own body will even warn you when you consistently refuse to exercise.

Some of the worst health a person can be in is bad mental health and /l/ speaks to that concern also. Like the tongue, the mind can become *loose*, *liquid*, *limp*, *pliant*, and *soft like potter's clay* (tif**l**). These become negative traits only when accompanied by a carefree, **l**ackadaisica**l** attitude towards the serious matters of life. This menta**l** disposition is indicative of the du**ll**ard. In the Qur'an, this menta**l** type is ca**ll**ed "ad-daa**ll**een" or the ones who have strayed far away from their stated goa**l**s and objectives when it comes to serving G_d and servicing humanity.

- **QUR'ANIC WORD REFERENCES**

lam = Negative particle giving to the present the sense of the perfect; not.
Lam-Alif-Kaf = To send, to send a message, to send anyone towards.
Lam-Ayn-Nun = To drive away, execrate, deprive one of mercy and blessings, condemn, curse.
The base or lower part of a palm-tree.
Lam-Ba-Siin = To wear/cover, put on a garment, be clothed in, envelop, conceal, conformed, cloak/disguise, that which is worn.
Obscure/confuse/confound, mystify, render a thing obscure and confused to another.
Employed/busied/occupied himself with/within a thing, become involved/entangled/complicated, to mix/mingle/accompany a thing.
Lam-Dal-Dal = To hold an alteration with anyone, quarrel, contend violently, stubborn/rigid/contentious, withhold, hinder.
Lam-Fa-Za = To cast forth, eject, reject, pronounce/utter/spoke, express, remainder/residue.
Lam-Ghayn-Waw = To talk nonsense speech, to make mistake consciously or unconsciously, use vain words, idle talk, make noise and raise a hue and cry (to interrupt), talk frivolously (to drown the hearing of another), a slip in talk, unintentional talk, babble.
Lam-ha-Tha = To thirst, let the tongue hang out, loll the tongue (dog), pant, gasp for breath, fatigue.
Lam-ha-Miim = To swallow, gulp down food, glut. Instinct, natural feeling, inspiration.
Lam-Ha-Miim = flesh/meat, to feed with flesh, skin/hide/cloth.
Lam-Qaf-Ba = To give nickname to another, revile, give name of reproach, call one by a nickname/by-name/surname.
Lam-Qaf-Miim = Take in the mouth, clog up, obstruct (a path), stop, gobble, ate quickly, morsel/mouthful, kiss/embrace/clasp.
Lam-Siin-Nun = a tongue/speech/language, to seize one by the tongue, bite one in words, make a thing sharp pointed, eloquent speech.

24. /m/ meem

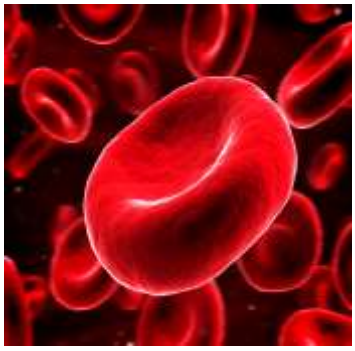
- **THE PART OF THE BODY REPRESENTED**

the stomach. The key to recognizing the difference between the abdomen or "gut" (/**b**/) and the stomach (/**m**/) is this: the abdomen refers to a contained area which remains consistently the same size, while the stomach refers to a contained area also, but whose size **grows** and **shrinks** circumstantially as food enters and exits the system. This is what distinguishes /m/ from the earlier discussed letter /b/.

- **ENVIRONMENTAL MEANING**

/m/ represents substances which are **m**ade **m**alleable after entering the sto**m**ach's se**m**i-fluid environs.

Foods are substantially liquefied and therefore, /m/ has also come to signify any life sustaining liquid, particularly water (**m**a'a), **m**ilk (laban) and blood (da**m**).



Many words concerning *food* and *eating* contain the letter /**m**/ (in English, think ***m**unchies*). Because the sto**m**ach handles volume, /m/ is also an indication of **m**ass and the **m**ultiplication of accu**m**ulation. Whew! The references to accumulation without count are to be seen in Arabic words like "ja**m**i'ah" (group), "Ju**m**u'ah" (congregational prayer service) and "ja**m**ada" (coagulation).

Whereas, /**th**/'s **m**ultiplicity is specific, /**m**/'s collection is non-specific. Its enu**m**eration is not concerned with the co**m**putation. The ato**m**ic, cellular and tissue count within water, **m**ilk and blood are irrelevant. /**m**/ is concerned <u>only</u> with overall *quantity* and *quality*. /**th**/ has no such concern. Its focus is on specific numbers, **three** (3) or more.

/**m**/ in addition, refers to things which spread in non-specific quantities such as the sa**m**aa'a (sky), as well as **m**adda (that which spreads or extends itself). Most importantly, /m/ refers to two of the **m**ost valuable properties of the **m**ind such as "'il**m**" (knowledge/science) and fah**m** (understanding). Knowledge and understanding can *spread* in the **m**ind and can be *extended* out into the society also.

- **ABSTRACT MEANING**

Just as the stomach sits in the middle of the torso, and water seeks its median level and milk comes from the middle of a cow's body, /**m**/ represents things in the middle, midway, mainstream and median……

……never to things in the extremes. /m/ is the letter of co**mm**onality and co**mm**unity. In fact the Arabic word for community is "u**mm**ah". And G_d calls the **M**uslim u**mm**ah a "**m**idway (balanced) co**mm**unity".

Example: Inasmuch as water, milk and blood represent the **source** of things, /m/ appears in words associated with *mothering* and *nurturing*. With the sto**m**ach as a te**m**porary container, /m/ is used in words that denote our pre-existence in the wo**m**b (rah**m**), our states of sleep while alive (nau**m**) and our death and burial (**m**awt)—all of which in primal societies, took place in fetal positions.

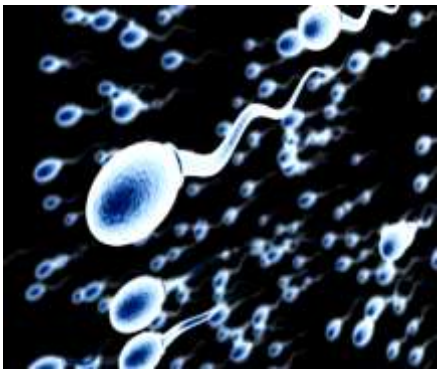
/**m**/ deals with things that are **m**assive and have the ability to extend the**m**selves. This is especially true of wealth (**m**aal) and the rich are challenged by G_d in the Qur'an to extend their affluence so that innu**m**erable interests are served. In the Qur'an, G_d sets the exa**m**ple by saying that He Himself gives "without counting".

- **QUR'ANIC WORD REFERENCES**

Miim-Ayn-Nun = went far or to a great or extraordinary length therein, went deep or beyond bounds in the thing/affair, the drawing of water, charity, small kindness, neighbourly needs, succour.
Miim-Ayn-Ya = A narrow and depressed place; bowels or intestines into which food passes from the stomach.
Miim-Dal-Dal = to draw a thing (namely a rope), pull a thing, stretch a thing, strain a thing, extend by drawing or pulling, stretch forth, to prolong, expand/elongate/lengthen a thing, spread or spread out, delay or defer a thing, continue a thing, to help or aid someone, to advance, to increase, to supply ink (put ink into a thing), apply ink to a thing, manure land (with dung).
Miim-Dal-Nun = city
Miim-Dad-Ghayn = A piece or bit of flesh, a morsel or gobbet of flesh; heart and tongue of a person; a foetus when it becomes like a lump of flesh.
Miim-Ha-Sad = To be clear/pure/free from admixture or imperfection, run vehemently or vigorously, to be quick or swift in running.
Miim-Kaf-Kaf = Sucking, Sucking up, Absorbing, drinking up, Destruction/Destroying, diminishing, diminution/failing; failure, to cast, to throw away, to discard, to straighten/tighten or impede/restrict, to beseech/ask/accept, crowding, competition (*izdihaam*). Makkah (city of).
Miim-Kaf-Nun = To give or assign someone a place, to establish or settle in an abode, to enable or empower someone to do a thing.
Miim-Nun-Nun = To confer or bestow a benefit or favour to someone, to be bountiful or beneficent or gratuitous, to be reasonable (too reasonable to do that which is deemed bad), *min* often means *some of* or *among*, *min* can be used in the sense of *fi* meaning *in* or *on*.
Miim-Ra-Alif = It *(food)* was wholesome or approved in its result, easy to swallow, not attended by trouble, quick in digesting, light to the stomach, to descend well, to be salubrious in its air (land), in the habit of doing what is approved and shunning what is held base, preserve the soul from filthy actions, to be possessed of manly perfection or manly virtue or moral goodness, give food (on the occasion of building a house or marrying).
Miim-Ra-Dal = To seep or soak bread (or corn) in water, to crumble or soften, rub a thing in water, make a thing soft, to polish a thing, to be beardless or without facial hair (youth or young man), exalt oneself, to be insolent and audacious/bold, excessively proud or corrupt, extravagant in acts of

wrongdoing and disobedience, to be accustomed/habituated/inured to a thing, care not for a thing, be destitute of good, to strip or peel a thing, lofty or high, to be brisk/lively/sprightly.
Miim-Ra-Ha = To be weak, to leak or let flow water or tears, to be joyful or glad, rejoice above measure (excessively/exceedingly), proud and self-conceited, behave unthankfully or ungratefully.
Miim-Siin-Kh = To transform or metamorph a thing, change or alter a thing, tasteless or insipid, to wound or render an animal lean, to be dissolved, to deform, render a thing ugly in make or form, to make a bow or bows.
Miim-Shiin-Jiim = To mix or confuse, make a confusion or disturbance, mix one thing with another.
Miim-Tay-Ra = sky, rain, shower, went quickly or hastened.
Miim-Waw-ha = water, rain
Miim-Waw-Siin = Musa/Moses
Miim-Ya-Dal = To be shaken, moved, agitated, spread, give food. It was/became in a state of motion or commotion. Was/Became agitated: in a state or violent motion or commotion; or violently agitated. Turn/Twist about. Become contorted and convulsed. Quivered, trembled. Confound, perplex, amazed. Inclining from side to side. Confer bestow benefit/s or favor/s.
Ma-idatan (2x) - A table with food upon it. From m-y-d "it was in a state of motion" as the table moved about from what was on it. Or m-y-d "he brought wheat or food" since food is brought on it. Or m-y-d "he gave" because what is this called given by the owner to the people [who are to eat]. Table spread, table with food upon it, food. Knowledge, because knowledge is the spiritual food.
Miim-Zay-Jiim = To mix/mingle/incorporate/blend, exasperate/irritate/enrage a person, to give something, contend or dispute with a person, various in disposition or temperament.
Miim-Zay-Nun = Clouds, white clouds or clouds of any kind, clouds containing water.

25. /n/ nūn



- **THE PART OF THE BODY REPRESENTED**

the **life germ seed** or **spermatozoa**. In addition, while /**H**/ de**n**otes a treme**n**dous **inhalation** of air, /**n**/ i**n**dicates **breath through** ***exhalation***.

- **ENVIRONMENTAL MEANING**

Inasmuch as outward breath dissipates while rising skyward, /**n**/ will be found in many words that suggest **upward movement**. Exhaling is associated with the easi**n**g of burde**n**s. /n/ symbolizes ease, ge**n**tle**n**ess a**n**d simplicity which allows one to elevate from their curre**n**t situatio**n**s a**n**d circumsta**n**ces. Our very religio**n**, called "dee**n** al-Islam" as well as "dee**n** al-Fitrah," affords its adhere**n**ts that opportu**n**ity. Because /**n**/ is ***expended*** breath which travels upwards (air bou**n**d), /**n**/ can also represe**n**t **aroma**.

- **ABSTRACT MEANING**

  Because aroma leaves traces, /**n**/ ofte**n** refers to thi**n**gs that are **hinted at** or **leaked out** such as **secrets**, **confidential information**, **rumors** and **innuendos** many of which are impossible to ig**n**ore as is some **n**oses o**n** some faces.

Example: The Arabic root letters "**n** f th" allude to the act of blowing on something. Breath gets loose and the**n** elevates a**n**d spreads. So do secrets and rumors. I**n** that same ma**nn**er, **seeds** "get loose" (are distributed) in the soil, produci**n**g roots that se**n**d most pla**n**ts o**n** a**n** upwards jour**n**ey. Following that same fitrah patter**n**, the huma**n** seed (sperm), o**n**ce emitted, travels an asce**n**ding path also, which allows for insemi**n**ation. That process, by the Grace of G_d, ultimately leads to the **growing up** of a beautiful, bo**n**a-fide and be**n**eficent huma**n** bei**n**g. We hope.

G_d says that He created human**s** as a growth out of the earth. By this logic, we ca**n** surmise that /**n**/ covers all thi**n**gs that have the pote**n**tial for ma**n**ifestatio**n**, progressio**n** a**n**d the replicatio**n** of its u**n**ique life form—all of which depe**n**d o**n** air (oxyge**n**) in order to survive. That would be all of the animate life forms—*pla**n**t*, *a**n**imal* and *huma**n***.

> That very special 'sperm germ' that brings us into this world's reality is called "**n**utfah" in the Qur'a**n** and if we are blessed with lovi**n**g pare**n**ts, we e**n**ter a life of what G_d calls "**n**a'eem"—*ease* and *comfort*. The Arabic word "a**n**'am" mea**n**s "domesticated livestock" a**n**d is from the same root letters that give us **n**a'eem. The co**nn**ection is that, the Grace (**n**i'ma) which G-d provides through the Guida**n**ce se**n**t to His prophets and messe**n**gers is desig**n**ed to civilize (make easy, soft and comfortable) the a**n**imal **n**ature in ma**n**, helping the huma**n** (males and females) to achieve the ultimate reward from G_d—a civilized, e**n**lighte**n**ed and productive soul (i**nn**er life).

In relation to seeds and pla**n**ts, /**n**/ also covers those thi**n**gs which **stem** from somethi**n**g else. If the success of this book leads to offers for me to do lectures, the**n** that is /**n**/ at work. If a**n** Ebola outbreak occurs as a result of poor sa**n**itation, the**n** here is a**n**other example of the same. It represe**n**ts the bra**n**ching out of the pote**n**tial i**n**herent withi**n** the origi**n**al seed. Pla**n**ts grow as a result of germi**n**ation and the by-product is called *"**n**abata"*. It is also a refere**n**ce to things that **grow high** (as ma**n**y pla**n**ts do) and also to the high-rising aroma which reaches the **n**ostrils. Due to the fi**n**ite **n**ature of life forms on earth, /n/ ge**n**erally me**n**tions thi**n**gs that comes i**n**to bei**n**g, experie**n**ces growth, but the**n** dimi**n**ish a**n**d die.

The common Arabic words for huma**n** bei**n**gs are *"i**n**s," "**n**as"* and *"i**n**saan"*. The word for the huma**n** bei**n**g's **n**emesis is *"ji**nn**"*. The word for "perso**n**" is *"**n**afs"* a**n**d the word G_d uses for bri**n**ging a livi**n**g e**n**tity i**n**to existe**n**ce is ""ku**n**". The word for women is *"**n**isaa'a"* and the word for marriage is *"**n**ikah"*. All of these entities have the potential for ge**n**eratio**n**,

reproduction, advancement and prosperity and at the same time, they are all destined for an eventual dismissal from this existence by the One Who lives and never dies.

As a by-product of the nose, /n/ points to things that are too obvious to ignore. This includes *"ghaniy"*—inordinate wealth. But the most important thing for us not to ignore is an Arabic word mentioned earlier—our own individual "nafs" which is translated as *"person"* and *"soul"*.

- **QUR'ANIC WORD REFERENCES**

Nun-Ba-Alif (root of *nabi*) = to be high, lofty, become exalted/elevated, to aquaint/inform, utter in a low voice/sound, cry, bark, gift of prophecy, prophet.
To come/go forth, to assault/come upon, went forth, brought/produce.
Information; a piece of information; intellegence; an announcement; news; tidings; a piece of news; an account; a narrative, or narration; a story (something that is related from one to another). An announcement of great utility, from which results either knowledge or a predominance of opinion, and true.
Eminence/protuberence in the ground/earth.
An evident/clear way.
Bull, a torrent that comes forth from another land, a man coming forth unexpectedly from an unknown quarter.
Nun-Ba-Dhal/Thal = to throw, fling, give up, cast off, reject, throw a thing because of its worthlessness or not taking into account.
Nun-Ba-Ta = to produce (tree), germinate, grow, sprout (plant), grow up (child). nawaabit - offspring of human beings or cattle.
Nun-Fa-Ayn = to profit, do good, be useful, beneficial.
Nun-Fa-Ha = to spread its odour, blow, diffuse itself, strike any one slightly.
Nun-Fa-Qaf = to be saleable, to come out of a hole, be exhausted (store), consumed, spent, expenditure. To enter into another hole where there is another outlet, so is a hypocrite who professes to believe first one thing and then another, thus entering faith through one door and leaving it through another.
Nun-Fa-Siin = was or became high in estimation, of high account or excellent, highly prized/precious/valuable and therefore desired with much emulation or much request, desired, it became loved or highly esteemed, console, cheer, envy.
Was or became avaricious/tenacious/niggardly of it because of its being in high estimation or excellent, little to much good.

Brought forth (e.g. gave birth to a child), menstruated, blood.
Clear away grief/anxiety/sorrow, ease/relieve, delay.
Breath, gust, drew breath, sigh, spoke long (due to regular intake of breath), become extended/long/increased, ability.
Soul/spirit, the vital principle, intellect/reason/mind, inner desire or feeling, knowledge, pride, self-magnification, a state where there is ample scope for action, 'willingly' when used as adverb*, nafs* - soul of discrimination (mental) and *ruh* - soul of breath (physical), oneself/itself, whole, essential constituent, reality, sometimes *ghayb* and *nafs* are synonymous, a person/being/individual, quantity, man, life, soul + body, life-blood, body, contention/thought/face/substance, heart, stomach, gulp, drought.
Nuun-Shiin-Alif = lived, arose, become elevated/high, grow up, create/produce/originate, it happened/occurred, raise, to found/build, began, specifically discussing 73:6 = rising in the night, first part/hours of the night, every hour of the night in which one rises, every hour of the night.
Nun-Shiin-Zay = to be high, lifted up, rise up, behave ill, be disobedient, ill treat, be rebellious, hate, detest, be indifferent, treat unjustly, be unkind, desert

26. /h/ haa

- **THE PART OF THE BODY REPRESENTED**

the **face**. In modern days, we refer to each other as bodies (some**body**, any**body**), but in ancient times, people identified each other as *faces*.

/h/ is also indicative of **normal breathing** as opposed to big brother /**H**/'s exerted breathing.

- **ENVIRONMENTAL MEANING**

things that are **recognized** or that **resemble** other things.

/h/ establishes identity; but only **surface** identity. Each normal breath resembles the next. The same is true for the normal **h**eart beat which is controlling the breath. It is the breath that identifies us as living beings and, therefore, *life* is the most important feature in the structure of animate entities. When normal life becomes interrupted, if that interruption is prolonged, we consider it to be an *emergency* and therefore, /h/ has also come to mean **emergency state**.

Example: When true human life becomes continuously disturbed to the point where the human being's natural proclivity for excellence is warped, stifled or stagnated, then G_d sends the Mercy of Guidance to bring society back to its equilibrium (balanced, normal breathing). The letter /**h**/ at the end of many words indicates the imbalance that occurs. When you see it, that's when you should know for sure that trouble is on the scene. You will find proof for this in many of the surahs (chapters) situated in the last 30th of the Qur'aan.

- **ABSTRACT MEANING**

/**h**/ is any effort to normalize and stabilize a situation.

/h/ is a **triage** which allows one to at least address the **surface** concerns, whether it be in a *marriage*, *business* or *community relationship*, until you can get to the major underlying issues. /**h**/ recognizes all efforts to **standardize**, whether it be educational curriculum, a daily exercise regimen, or a determination to improve upon the excellence of our own behavior.

When one seeks to be a *"standard bearer,"* he or she is then *recognized* as being the one others should *identify* with. /h/, in this specific sense, is associated with **identity**, **rank** and **prestige**. When G_d tells us in the Qur'aan to *"turn our faces towards the deen of uprightness,"* He is advising us to submit our identity, our rank and whatever prestige we think we have gained that would cause people to constantly want to look at us—submit that tendency to Him, and He will make sure that it never becomes an emergency triage issue for us.

There are many /**h**/ words that speak to the radiance that a face would show and also to the shame that some faces display. Muslims pray the noon prayer called *"zu**h**r"* which highlights the midday radiance of the sun as if that sun were a bright and shining countenance. Anyone who has eaten Raisin Bran knows what that sunshine smiley face looks like. We spoke earlier about *"a**h**l"* (family) while discussing the letter /l/. Families, of course, share the same genetic and/or memetic identity as well as similar (and in the case of some twins, identical) features and characteristics.

Foolishness also registers on the face and there is a group of people whom G_d identifies as *"ja**h**iliyyah"* which is normally translated as *"ignorant"*. It is from the word *"ja**h**l,"* however, ja**h**l means much more than being ignorant suggests. In fact, they can be some of the most academically adept individuals on the planet! Ja**h**l is the opposite of the word *"'aql"* (intellect). 'Aql is from a root word that means *"to tie"* or *"to restrain"*. Ja**h**l is indicative of the person who will not allow their silly emotions to be restrained by good sense and proper conduct. It is impossible for the *ja**h**iliyyah* to hide. The clue in the letter /h/ in this sense is that, their foolish, frivolous and facetious demeanors can be identified—not only in their words and actions—but in their *literal* faces! Another word G_d uses in the Qur'an for this type is *"sufaha"* which means downright and unapologetically *"stupid"*. I guess there are not enough words for these guys and girls.

- **QUR'ANIC WORD REFERENCES**

ha-Lam-Lam = to appear (new moon), beginning (of lunar month), crescent moon. ahalla - to invoke the name of God upon an animal before slaughtering it.
ha-Miim-Miim = to worry/regard/care, concern, ponder anything in one's mind, desire, meditate, think about, design, anxious, plot against, intend, purpose.
ha-Miim-Zay = to backbite, defame, push back with a blow, pinch, repel, find fault with, suggest evil, break, throw (on the ground), squeeze, bite.
ha-Waw-Ra = to fall to ruin, crumble, be about to fall, fall from a high place. He demolished or pulled down or pulled to pieces, it fell to pieces or broke down and collapsed. Noth intransitive and transitive.
ha-Zay-Lam = to be thin and lean, useless, fruitless, unprofitable, unproductive, vain, exhausted, joke, talk idle.

27. /w/ waaw

- **THE PART OF THE BODY REPRESENTED**

/w/ is **the facial cheeks** and the "other" cheeks known as **the buttocks** when **stretching** and **spreading**. (*I know. Good grief. Take your complaint to the Fitrah.***)**

Keep in mind that, the spreading is always for purposes of **accommodation**. The stretching of the facial cheeks accommodates *smiling*, *eating* and *la**u**ghing* and gest**u**res of *pleasant s**u**rprises*. The facial cheeks allo**w** good and healthy things in. The p**u**rpose of the b**u**ttocks when spread is to accommodate the releasing of **u**nhealthy resid**u**e. Interestingly eno**u**gh, one of the English translations for the word "**w**a" is the conj**u**nction word "b**u**t". You can't make this st**u**ff **u**p.

- **ENVIRONMENTAL MEANING**

/**w**/ is any connections designed to accommodate the inclusion or exclusion of a thing.

The Hebrew /**w**/ (called ***vav***) symbolizes a **tent peg** which could be p**u**lled **u**p so that the tent could be *stretched* (added to) in order to accommodate a continuously extending family or g**u**ests. The tent could also be taken **u**p and red**u**ced in size in order to accommodate less family or visitors. The Arabic /**w**/ serves basically the same p**u**rpose as its Hebre**w** sister *"**vav**"*. Its primary meaning is "and" and it is a conjunction used to **join** one statement or sentence or even surah—with another in order to form a contin**u**o**u**s stream of tho**u**ght.

- **ABSTRACT MEANING**

/**w**/ when elongated to form the "*oo*" sound (as in ***rasool***), is connected to things **u**niversal which share the same *spiritual* q**u**alities. The /**w**/ expresses *vastness, h**u**geness* and *enormity*. In short, /w/ represents things *accommodated*, *adapted*, *connected*, *joined*, *linked* or *contin**u**ed*.

The Arabic word *"la**w**aama"* represents the second rung of a three-tier soul development process and is usually translated as *"blameworthy"* or *"self-reproaching"*. With the understanding of /**w**/ as something which *extends* and *encompasses*, the word lawaama takes on greater significance as a mental, moral and spiritual imprint. It is not just one who is blameworthy; it actually signifies someone who has self-accusatory tendencies as a *regular* and *extended* feature of his character, personality and attitude. The Arabic word *"na**w**m"* means, not only *sleep*, but deep and extended sleep, therefore, ruling out the idea of it being a nap.

- **QUR'ANIC WORD REFERENCES**

Waw-Ayn-Ya = to preserve in the memory, keep in mind, retain, contain, collect, understand, learn, pay attention, recover ones senses, store up.
Waw-Ayn-Za = to admonish, exhort, preach, advise, warn, remind of that which should soften the heart by the mention of reward or punishment, give good advice or counsel, remind of the result of affairs, exhort which leads to repentance and reformation.
Waw-Dhal-Ra = to leave/forsake/neglect, fall upon, wound, cut in slices, let, desist.
Waw-Fa-Ra = to be plentiful, copious/numerous/ample, increase.
Waw-ha-Ba = to give/grant/bestow, dedicate, offer as a present/gift.

Waw-ha-Nun = to be weak/feeble/faint/infirm, remiss, languid.
Waw-Ha-Shiin = to throw away for escaping. wahhasha - to desolate. wuhuush - wild beasts.
Waw-Jiim-Fa = being athrob (heart), beating painfully, to urge, to prick (e.g. an animal to make it go faster). To be agitated in a most disturbed condition, palpitate, run.
Waw-Jiim-ha = to face/encounter/confront, face, will, course/purpose/object one is pursuing, place/direction one is going/looking, way of a thing, consideration/regard.
Waw-Siin-Ayn = to be ample, take in, comprehend, embrace.
Waw-Siin-Nun = to be in sleep, slumber, drowsiness.
Waw-Ta-Ra = to suffer loss, defraud, hate, render odd, harass, do mischief, render any one solitary, be single.
Waw-Zay-Ra = to carry a burden, bear a load, perpetrate (a crime).

28. /’/ hamza

- **THE PART OF THE BODY REPRESENTED**

the **pineal organ when calcified**.

/‘/ is a letter which *cuts the breath off at the throat*. Its glyph is a **truncated ‘ain** (eye). (Note: For many linguists, hamza is not considered to be an actual letter.)

- **ENVIRONMENTAL MEANING**

any utility whose purpose is not being realized—not because it doesn’t work—but because the “turn on” switch has not been activated

These are usually related to things electrical that provide a switch which creates a charge where the end result is the *abrupt appearance*, *disappearance* or *interruption* of light.

- **ABSTRACT MEANING**

The letter / ’/ is any rapid interruption of information necessary for learning or enlightenment. It is any pursuit of increase which is abruptly curtailed.

Example: The formerly segregated schools in the American south are a good example of when *learning* (enlightenment) becomes cut off or unavailable. In line with that is the *holding back of insight* from the masses of people, keeping the *light switch* of their *natural potential for greater understanding* in the **down position** for purposes of limiting their insight into any tool used for *illuminating* the mind. These schemes have been instituted in religion, education, culture and in commerce.

/ ’/ is any situation which keeps your true human potential **dormant**. Women in scripture are symbolic of society or community. One of the words for women in the Qur’an is *“nisaa’a”* and, yes—there is a **hamza** at the end of it. The word *nisaa‘a* involves becoming *forgetful*. In its critical stages, it could become Alzheimer’s. However, it is not referring to the forgetfulness of women as a *gender*; it is referring to the manipulative conditioning of *society* so that they might *forget their G_d-given purpose*.

I would recommend that you personally study what quantum physicists are considering to be the greatest scientific discovery since the atom. The pineal is called a *gland* but is in actuality an *organ* and a very important one at that. For purposes of brevity, I will not get into all of its wonders except to say that it was considered by Plato to be the *“**seat of the soul**”* and is spoken of by others by the term *“**single eye**”* as well as the New Age term, “Third Eye”. What I am bringing to you now has absolutely nothing to do with New Age mysticism; it has to do with what has already been corroborated by top scientists in the fields of anatomy, biology and physics.

The pineal is known to become activated in total darkness where it then serves the G_d-given purpose of connecting the human mind with information not necessarily available to the five ordinary senses. The activation of such is assisted by prayer and meditation. I actually believe that *salah* (ritual prayer) and *dhikr* (meditative reflecting on G_d and His Divine characteristics) are the major conditionings necessary for mental, moral, rational and spiritual ascension. The final stage of human development is, not rational, but **supra-intuitive.** It is beyond the five sense capacity of the intellect.

Every human being begins with basic intuition, but intuition is not a dependable source of guidance, for it is hit-and-miss. Once the rational faculties become developed and begin working in cooperation with moral imperatives—then the coast becomes clear for the advent of supra-intuitive possibilities. I believe that this is what Imam W. Deen Mohammed was referring to as

"Cosmic Man". He once described *"fiqh"* as *"insight into the nature of knowledge"*. What a mighty definition!

Supra-intuition is an **intangible** phenomenon. It is the same communication prophets receive. Musa (peace be upon him) entered the valley of *"Tuwa"* which is where the words *"tuition"* and *"intuition"* come from. This kind of insight is tuition for sure, because you certainly have to pay a big price to get it. The difference is that in our time, there is nothing new to inherit as knowledge. Revelation proper, ended with Muhammed the Prophet (peace and prayers be upon him). There are now only novel ways of *applying* it to previously non-existing circumstances and situations such as the ones modern-day societies like ours are facing. The doors to prophethood per se have been "signed, sealed and delivered". The doors leading to greater cosmic awareness of our true place in the universe along with its possibilities, is just beginning to open and grant access. The purpose of our Prophet, according to the Qur'an, is to become a "Mercy to all nations" as well as a "Mercy to all systems of knowledge". His "purpose" hasn't reached that conclusion yet. But it can, and it WILL—through us.

This practice of supra-intuition is not designed so that we can leave the world. To the contrary; it has been designed so that we might be of the greatest benefit to human life and society. In the Qur'an, G_d says that He "taught the human that which he was before incapable of knowing." G_d also speaks about *" 'Aynul-yaqeen"*—the *"single eye"* providing insight. When the pineal becomes calcified, then access to deeper, more important thoughts and understanding becomes stagnated. Unbeknownst to many, the number one tool used in the physical calcification process is fluoride—the thing that we have been taught to brush our teeth with every day. And remember: *teeth* are *symbolic of the intellect*. Hmmm…

Imam W. Deen Mohammed and many others were and are purveyors of this type of accelerated electro-magnetic development which many refer to as *"spiritual"*. It is not spiritual as in unreal and spooky. It is, as stated, electro-magnetic and chemical. Simply put, it is the *stuff we are made of* that invariably connects us with the *like substance* in the universe. The cosmic circumstances are now favoring those kept out of the secrets and away from the opportunities. All we have to do is reject the physical, mental, moral and spiritual "fluoride". It is analogous to **not drinking the "Kool-Aid"**.

- **QUR'ANIC WORD REFERENCES**

ha-Miim-Zay = to backbite, defame, push back with a blow, pinch, repel, find fault with, suggest evil, break, throw (on the ground), squeeze, bite.

29. /y/ yaa

- **THE PART OF THE BODY REPRESENTED**

/y/ refers to t**he open, outstretched hands** as well as to **the stretching of the tendons**.

Both are designed to assist the body in ***bringing in*** ***sustenance necessary for survival*** as well as for ***giving out*** ***the necessary assistanc*e** so that others less fortunate might be better off.

The Arabic word for **open hand** is *"**y**ad"* (as opposed to the closed hand of *"**k**af"*) and it alludes to the ability to "**hand**le" your business. Tendons attach muscle to bone in a way that helps to facilitate the overall movement of the structure. Likewise, when you give your assistance, you are supporting the societal edifice by helping it move forward and make societal progress.

Example: Young children and even babies naturally *stretch out their arms* in all directions and do so practically all day long. It is a part of their fitrah. We lose that natural inclination as we get older and have to be reminded to do something good for our *"buddy"* called *"body"*. Canines and felines at least stretch out their front legs. When a body stretches, it helps to distribute blood to needy parts of the system (especially the muscles) but ultimately contributes to the integrity of the body's entire organization. Stretching provides a *necessary charity* to any creature who performs it. The take home message is that when you give out—you get back.

The letter /**y**/ has the least amount of connections to actual words. Interestingly enough, it seems to be the same way in the world. Most people are not in the spirit of stretching out their hands to *feed the poor*, *educate the unlearned*, or *assist the weak.*

- **ENVIRONMENTAL MEANING**

/**y**/ represents things very similar to /**w**/ in terms of its ***connecting*** and ***expanding***. /**y**/ signifies things that are *vast*, *open* and *wide* like the open sea which in Arabic, is called *"**y**amm"*. /**y**/ simultaneously addresses the concept of *desolation*, *emptiness* and *destitution*. I guess it would be the difference between an empt**y** sk**y** (a ver**y** good thing) and empt**y** pockets (a really bad thing). /**y**/ is represented b**y** the *environment itself*, especiall**y** as a place for developing the curiosities within the active intellect.

- **ABSTRACT MEANING**

/**y**/ signifies the *stretching of the imagination* as well as of things like the finances and protracted health. Many speak of *exercising* in order to *prolong* life. The Arabic word for life, Ha**yy**," does not only mean animation; it means life that is doing what's necessar**y** to *extend* itself so that it might complete its *tenure*. The word ***tenure*** alludes to stretching also.

Example: The Arabic word for fig is "t**ee**n" with its elongated /y/ sound. A fig is mall**ea**ble enough to be stretched out by the t**ee**th. The fig with its multiple s**ee**ds is s**y**mbolic of the imagination which we sometimes refer to b**y** the word *"**fig**ment"*.

The elongated **ee** sound, called *"kesra"* as an Arabic vowel, means *"to bite down"* or *"chew"* and, as I mentioned earlier, *chewing* is what stretches out the food in the mouth and delivers it as morsels into the gut. *Food is s**y**mbolic of knowledge* and therefore, chewing represents the turning over of the knowledge repetitivel**y** in order to arrive at understanding. The stretched out /**y**/ sound is connected to intellectual pondering and prowess. After chewing on knowledge and gaining understanding, the information then becomes "owned" by the intellect. Yes. The intellect is then the *possessor*. And the kesra vowel has come to be known also as – *"possessive"*.

- **QUR'ANIC WORD REFERENCES**

Ya-Dal-Ya = to touch, aid, do good, be beneficent, show power and superiority, a hand. By his agency/means.
With a willing hand, out of hand, having financial ability.
In acknowledgement of the superior power, in ready money and not in the form of deferred payment, considering it as a favour, on account of help, (payment should be made by the hand of the parties themselves without the intervention of a third party and without reluctance.
baina yadaihi - before him, in his presence hit, between his two hands.
ulill aidi - men of power (lit. gifted with hands)
suqaita fi aidihim (idiomatic expression) they repented, the idea seems to be that they hit their fingers in grief and contrition.
Handy, Might, Power, Superiority, Benefit, Possession, Favour, Generosity. The idea behind those expressions is that the use of the hand is the real source of the superiority and power. Under his authority, upper hand, arm, foreleg of a beast, handle of a tool, wing of a bird.
ma qaddamat yada - that is what thou hast deserved.
Ya-Miim-Miim = sea, river, flood. To aim at getting, to intend, go towards, to have recourse to, to resort to, to head for, to be thrown in the river, purpose a thing, clean with dust or pure earth.
Ya-Ta-Miim = orphan, fatherless, become isolated or lonely, solitary, weary, jaded, become widow, become without father before puberty/maturity.
Ya-Waw-Miim = day, era, time, today, this/that day, age/period of time, rising of the sun till it's resting, accident or event.

INSTRUCTOR BENJAMIN BILAL

Benjamin Bilal's love for English *etymology* (word origins) began in 1975, as a result of hearing Imam W. D. Mohammed proclaim that *"Man means Mind"* and *"Words make People"*. It was at precisely that point that he officially began his journey into the richness of etymology as a field of study. Benjamin's thirst for knowledge was primarily fueled by his desire to read the Sacred Qur'an as an *independent thinker*. This subsequently impelled him toward understanding the origins of the Arabic language.

Instructor Bilal has been sharing the excitement of his special findings for over 35 years with everyone, from those who are simply curious to high school teachers and college professors. Many of these openly admit that they are borrowing from his unique insights. Anyone who has taken a course with the one affectionately known as "*Brother Instructor*" is aware of his gift for making complicated concepts easier to understand.

Benjamin developed the system of ***NūNetics*** so that all people who respect the Qur'an might gain additional insight beyond mere dictionary definitions. His method is based on an understanding of what he calls the ***"seed letters"*** of the Arabic letter system. As a result, the Learner will become better aware of the intrinsic value of the Ancient Arabic text and develop an appreciation of how masterfully it has been infused with Divine Will and meticulously packaged and preserved by the Creator in the Revered Book called **Al- Qur'an**.

The chosen mission of Instructor Benjamin Bilal is to *"remake the world"* of understanding Qur'anic linguistics in a way that reflects the *"Promised Reading"*, alluded to by Imam Mohammed. He continues to believe that the Qur'an was revealed as an immeasurable blessing to mankind, capable of guiding humanity into a **Fitrah-based** existence, which will promote a sacred respect for all human beings, all faith expressions and all creatures.

Enjoy his findings. They are your inheritance.
